**Subject:** Draft West Quardrant Plan

We would like to encourage City Council to keep the heights in the West End at no more than 100 feet. We see no reason why they need to be taller. Lower heights encourage pedestrian use and keeps the focus on the historic buildings that exist - specifically the library and the old churches. In our view any additional structures should focus on market rate housing and local retail. Portland is a great city that has been referred to as a city In park. Please help keep it that way!

Thank you for your consideration.

Margot and Bill Larrabee
