Subject: West Hayden Island

Is the PSC really turning its back on the residents of Hayden Island and North Portland after making a commitment to protect us and after 5 years of working on this? Where is the equity for all in that?

Keep WHI designated as an open space. It makes no sense to convert critical natural areas to industrial use. Make the companies and the Port clean up the huge brownfields and utilize that instead.

The Draft Comp Plan is a sneaky way for the Port and the city to put a knife in our back. Stand by your commitments, remove the section on WHI from the Comp Plan.
