**GRANT AGREEMENT NO.**

This Grant Agreement ("Agreement") is between the CITY OF PORTLAND, OREGON ("CITY" OR "GRANTOR") and South Waterfront Community Relations (OR "GRANTEE") in an amount not to exceed \$35,000. This Agreement may refer to the CITY and GRANTEE individually as a "Party" or jointly as the "Parties."

**RECITALS:**

- A. CITY has allocated funding in the adopted budget to allow GRANTEE to collect and analyze information that will enable GRANTEE to develop parking principles for South Waterfront.
- B. GRANTEE's project includes data collection, analysis, research and reporting key information about district parking, shared parking and variable pricing approaches in leading American cities. GRANTEE's project may benefit CITY's parking management policy-making efforts.
- C. GRANTEE's data collection and analysis of on-street parking is helpful to determine if current policies adequately support parking management objectives in South Waterfront and other areas of the city.

**AGREED:****I. ACTIONS TO BE TAKEN BY GRANTEE**

Pursuant to the above Recitals which are fully incorporated into this Agreement and in consideration of the grant funds provided by CITY, GRANTEE agrees to perform the following actions and/or spend grant funds in the following way:

**Purpose**

Collect and analyze parking data in the South Waterfront and determine, if any, of the above parking approaches would be beneficial to South Waterfront residents, employees and employers.

**Project Scope****A. Variable Pricing**

See Kittelson's 2008 Parking Management With Variable Pricing for a comprehensive definition of this management tool.

For three case study cities, summarize:

- Why do they use variable pricing? What are the policy objectives they are trying to achieve?
- Where do they do it?
- How does pricing vary? By location? By day? By time? By user?
- How are rates determined?
- How frequently are rates reviewed? Who reviews the rates? What is the review process?
- How do drivers know how much to pay?
- What types of meters are used?
- How does the public respond to parking changes? Are they supportive? If there was resistance, on what grounds?
- How does variable pricing affect the City's revenue stream?

## **B. District Parking**

District Parking is the centralized and deliberate supply and management of parking in garage(s) or lot(s) for multiple buildings and uses within a district. The district may be all blocks within a certain distance of each other.

For three case study cities, summarize:

- Why do they use district parking? What are the policy objectives they are trying to achieve?
- What is the organizational structure that initiated and implemented shared parking?
- How is the program funded? How is it operated?
- If new parking was provided, how was it funded? How is it operated?
- How do they measure success?

## **C. Shared Parking**

Shared parking is the use of the same parking spaces by different uses, perhaps at different times within a 24-hour period or weekday versus weekends.

For three case study cities, summarize:

- Why do they use shared parking? What are the policy objectives they are trying to achieve?
- How much of the parking supply in a building or a district is shared vs. dedicated? How did they determine the appropriate mix?
- How is shared parking tied to the development it serves? Is it completely unbundled? Are there use agreements or priority access rights?
- What market and public actions were needed to incentivize and/or regulate shared parking?
- How has shared parking increased the efficient usage of individual parking spaces 24/7 by multiple uses/trip types?
- Did allowing shared parking lower the cost of new development?

- How do they measure success?

Note: If one case study city uses more than one of the tools above, it can be included in both sections.

### *South Waterfront Information:*

#### A. Parking Data & Mode Split Data

The South Waterfront is interested in better managing the on-street parking supply. Gathering on-street parking data and mode split information will help inform, what, if any, parking approaches are best suited for areas of the City including the South Waterfront area.

Data includes:

- On-Street Parking Turnover and Occupancy Data. SWCR collect similar data needed for a report similar in scope and content to that of the CEID parking study managed by Rick Williams Consulting.
- Mode Split Data. Vehicle, public transit, bike and walk data will be gathered for entrance/exit of the South Waterfront.

- C. Termination for Cause. Termination for cause based on GRANTEE's misuse of grant funds shall be effective upon notice of termination. - I. Maintenance of and Access to Records. GRANTEE shall maintain all books, general organizational and administrative information, documents, papers, and records of GRANTEE that are related to this Agreement or GRANTEE's performance of work or services, for four (4) years after CITY makes final grant payment or the termination date of this Agreement, whichever is later. CITY may conduct financial or performance audit of the billings and services under this Agreement or GRANTEE records at any time in the course of this Agreement and during the four (4) year period established above. As applicable, audits will be conducted in accordance with generally accepted auditing standards as promulgated in *Government Auditing Standards* by the Comptroller General of the United States General Accounting Office. - K. Indemnification. GRANTEE shall hold harmless, defend, and indemnify CITY, and its officers, agents and employees against all claims, demands, actions, and suits (including all attorney fees and costs) brought against any of them arising from actions or omissions of GRANTEE and/or its contractors in the performance of this Agreement.
