Subject: NO to liquified propane export

I would like to express my strong opposition to the proposed export facility for Pembina's liquified propane.

The safety hazards this represents to nearby (low income) neighborhoods and, more importantly, the danger to the adjoining fragile natural areas, make it unacceptable. Overshadowing those local concerns is the larger concern of fostering the "burn it all" philosophy that is driving climate changes over the brink.

Thank you for accepting and conveying my opinion on this matter. I will be following the issue closely.
