Subject: Opposition to Natural Gas Terminal

Dear Ms. Anderson,

I am writing to urge you to **deny** the request from Pembina to modify the city's environmental code, which would allow it to export "fracked" natural gas from the Port of Portland. These method of gas extraction is destroying our planet, not only because of the technology being used to obtain the gas, but also because of the massive expansion of fossil fuel use it is enabling. Additionally, all of the additional danger and rail traffic from the proposed gas shipments would be a huge detriment to our city's quality and environmental sustainability efforts.

I hope that you will take the appropriate action to protect our planet from this horrendous proposal. Thanks for your attention.
