> Subject: Proposed LPG terminal on the Columbia River

>

>

> My name is Lucy Schneid. I live in NE Portland with my husband and two sons; my daughter is a U. of O sophomore in Eugene.

>

> I speak for the sake of my children when I request please do not acquiesce to Pembina Corporation's plans for an illegal LPG export terminal here.

>

> This is not what Portland means, what it stands for: hazardous materials going to and fro for the ruination of our environment. The zoning code prohibiting this from happening should not be modified at all. If anything, I wish it could include the whole state of Oregon. We moved here 21 years ago from Washington, D.C., for wonderful reasons, one of them being the great wide-open cleanliness of the great state of Oregon. We had such great expectations for our future here that we had our third child here in Portland ten years ago. We are far away from our families way out here, but we are so encompassed and swaddled by the purity of the environment and the camaraderie of the climate and environmental activists that we feel safe and sure of a beautiful and clean place for our children to live full, healthy lives. Please don't dash our hopes and expectations now. Do not allow a foreign company to come in here and change our way of life! It seems so much science fiction to think we would just allow the disrespect of our earth from greedy companies bent on making money from ruining our environment! How can we let that happen? Please save us from such an ugly, unhealthy future. Keep Portland and Oregon on the clean path to the future; a future worth living for, worth fighting for, for your children and mine.

>

> Thank you.
