Subject: Pembina proposal

Dear Susan Anderson,

I am writing to ask that you do not lift Portland's zoning and environmental codes to allow Pembina to build an export terminal on the Columbia. Doing so would run contrary to our city and region's own greenhouse gas emission goals, harm our environment, and set a dangerous precedent that our zoning codes which take decades to plan can be undone in an instant whenever they are inconvenient for a large corporation.

The Pembina project brings considerable harm and no significant benefits to our area. Please do not allow our codes to be changed to facilitate unnecessary environmental destruction.

Sincerely,

Lisa Frank
