> Subject: Please respect the great majority of your citizens--no propane port

>

> Hi!

>

> I'm Gary R Kirby, PhD plus a couple of masters; but no one needs advanced degrees to look long range at our changing energy resources and priorities and effect on our world to know that using our river and city and port to pump LPG from rail cars to ships is folly. The Ship of Fools is a long-enduring analogy begun by Plato. Please don't board that ship. Please don't let your commission be known by that name. Please keep our waters clean and our air clean. That's why a lot of us live here, come here as tourists, and why a lot of our grandchildren will also do so, if you vote no.
