

Planning and Sustainability
Committee
1900 SW 4th Ave
Portland Oregon

Dear Commissioners:

Pembina's proposed propane export terminal at the Port of Portland is being packaged as a bridge fuel. Propane isn't a bridge fuel. It's a false solution. Pembina, a Canadian company, wants to ship fracked ~~gas~~ propane to Asia from terminal 6. The weak argument that propane is a bridge fuel to displace other forms of energy is a red herring.

Portland is one of 16 cities in the country labelled as climate action champions and we shouldn't buy the lie; shipping 13.5 million barrels of LPG from our city is not green.

Please oppose this action!

Regards,

Bryan Bramley
