Commissioners of Planning + Sustainability:  
Dear Mayor + Portland Council Members:

How disappointing to hear that Portland Policy Leaders would even consider supporting new fossil fuel infrastructure at this point in history.

The proposed Pembina Propane Terminal is a terrible idea for several reasons:

Rolling back the noble position of Portland's Bureau of Planning + Sustainability to change the zoning to allow a fracking byproduct to roll through Portland to be shipped + burned overseas is 180° the wrong direction.

Even the Rockefellers are divesting from fossil fuel, not investing.

This project would damage the source land, endanger communities en route, and would add close to 10,000 TONS of carbon dioxide PER DAY to earth's atmosphere,

the proposal is lunacy based on an outdated paradigm.

Please protect Portland and our rivers and populace by keeping standing zoning regulations.

Sincerely, hopefully

Jennifer Claire Darity - (A native!)
