

Re: Proposed Propane Terminal Jan 4, 2015

Dear Planning and Sustainability Commission members:

Some of us understand that the more carbon we burn, the more we risk unstable and dangerous climate changes for all of us.

As Gov. Kitzhaber commented to the huge Portland crowd at the Sept. People's Climate March: We are the first generation to realize what we have done with our burning of carbon fuels, and we are the last generation who are able to do anything about this! We are counting on you Commissioners to act for all of us, to use your power to hold on to our natural wetland and wildlife protected areas, and to say "No" to the proposed propane terminal in our famous green Northwest.

Yours truly,

Judith M. Perry
