

Portland Planning and Sustainability Commission
Testimony re Zone Change for Terminal 6

I am here today with the Raging Grannies and as a grandmother who lives in the Portland area along with three of my grand children, I ask you not to change the zoning laws to lands around Terminal 6 that would allow the Canadian Pembina Tar Sands Corp. to ship by rail explosive liquid propane to be exported to Asia. This area is an earthquake risk and wildlife haven. Portland has recently received a sustainable energy leadership award. And this zoning change could open all zones to propane shipments. Let's choose clean water and quality living instead of promises tax revenue and jobs. Remember, the bottom line for big corporations is money for CEO's and investors.
