Planning and Sustainability Commission  
City of Portland

Dear Commissioners:

I believe the proposal for a new propane export terminal is dangerous and inappropriate for the City of Portland. Because the proposal requires a change in zoning, you have the authority to do the right thing and deny the application by Pembina. This project would do nothing to improve the economic situation in Portland or in Oregon.

Further, it would increase CO<sub>2</sub> emissions, increasing the dangers of climate change. And it would threaten our local river front environment, impacting wildlife, water quality and air quality.

On behalf of the citizens of Portland, you have an obligation to protect our interests in a livable environment that is being threatened by a foreign corporation. Please do the right thing!

Sincerely,

Rev. Katherine Jesch
