The Bureau of Planning & Sustainability

Dear Commissioners,

We are at a crucial time in our development of sustainability. Our primary focus must be in our ways of living on & with our earth - what we do now here beyond we into the lives of our children & all here. We are a living Earth Community - Truly the precious beloved community. We must not betray them by ignoring our stated commitment to reducing carbon by allowing propane terminals.

I urge you to keep faith with your stated commitment.

in respect,

Carolyn McJannet
