

I am opposed to re-zoning the waterfront property on the river to accommodate the proposed propane export terminal. The ~~said~~ terminal would be harmful to the environment of the Columbia river and if allowed would only be the beginning of oil & gas exports from the area. I am with "Friends of the Columbia Gorge" and we have been fighting to keep oil tankers and coal cars from being permitted along the Columbia Gorge and No means No - not any LPG, Oil, Gas or Coal export from the Port of Portland.
