> My name is Beata Alexander. I live and own a business in Portland. I want to see our city be a beacon for the rest of our country leading the way towards addressing Climate Change before it is too late.

>

> As a country, we are lagging behind other developed countries in the steps they have taken to develop alternative energy sources. I want us to lead the way towards a better future for our children and I am not even a parent. I care about this planet and all living things. Do not allow the construction of propane tunnels in the Port of Portland.

>

> Sincerely,

>
