Subject: Pembina Propane Proposal for North Portland

•

Re the [Pembina Propane Proposal](#) for North Portland:

The energy used to power buildings is the largest source of carbon pollution in Portland and should be monitored; the City needs to consult with independent experts on issues such as climate change, safety and jobs as opposed to relying on Pembina and the Port for its staff report; all neighborhoods within the blast radius of the trains, boats and facility need to be apprised of the risk with at least 30 days notice before the hearing; approving Pembina would be counter to our goal of being a national leader in responding to climate change.
