Subject: Pembina Propane Proposal

- The City needs to consult with independent experts on issues such as climate change, safety and jobs as opposed to relying on Pembina and the Port for its staff report;
- All neighborhoods within the blast radius of the trains, boats and facility need to be apprised of the risk with at least 30 days notice before the hearing;
- The energy used to power buildings is the largest source of carbon pollution in Portland and should be monitored;
- Approving Pembina would be counter to our goal of being a national leader in responding to climate change.
