

Dear Planning and Sustainability Commission,

It is neither the ethic of Portlanders and Oregonians to encourage CO2 emissions. Nor is it consistent with the Climate Action Plan of Portland. Thus, the Pembina's terminal is a bad idea.

Portland should say NO, like other Pacific Northwest cities, to being part of the fossil fuel export industry. Our future, your children's future and the future of children everywhere depends are our showing some wisdom.

Please, just say no.

Best regards,

Susan Bexton
