

Hi,

I'm just another Portland resident urging you to reject the Pembina request to rezone the area near Terminal 6. I'm sure you've heard a zillion reasons why other residents are opposing this change, and I agree with most of them, though I especially agree with those who are claiming that it sets an undesirable precedent and runs counter to our city's often touted goal of contributing to climate action and a future of cleaner energy. Of course, we have all benefited from fossil fuels and continue to rely on them, but a cleaner future will never come if we keep investing in and supporting the same fossil fuel sources that got us into our current climate crisis. In a small way, a vote to rezone is a vote to continue down this path.

Thank you for your service,

Ty Adams
