**Subject:** Proposed Pembina Propane Export Terminal at T6

Greetings,

I am opposed to the proposed Pembina Propane Export Terminal at T6.

There is something very wrong when a Canadian company wants to locate their propane export terminal in the United States. What I read into this is that they want to send their filth elsewhere so they can preserve an environmentally sound and clean reputation.

If the propane export terminal is located at T6 in Portland, what comes next - LNG, crude oil, coal? This could well be the first domino to fall in the morphing of Portland from a green city to a dirty city.

Please, let us not do this.

Respectfully,

Tom Dana
