

I am writing to express my opposition to siting Pembina's propane export facility at the Port of Portland's terminal 6.

I reside on Sauvie Island, well within the hazard area in the event of an accident at the proposed propane export terminal. As such, the terminal threatens my health and safety and that of many neighbors and friends. This is not acceptable to me. And that is especially so given that the use will contribute carbon dioxide emissions that further contribute to climate change. At a time when our nation should be doing all that it can to reduce CO2 emissions, and this City should be leading the way as befits its reputation for livability and sustainability, Portland should not be supporting any actions that run so contrary to these objectives. These are not the kinds of jobs this region needs.

Please vote NO on this proposed propane terminal.
