**Subject:** Not in my backyard, not anywhere

Dear Portland Sustainability Commissioners

Re: No zone change for propane storage and export

My family live and work in the Cully neighborhood in NE Portland.

Please fight Pembina and their proponents who want a zone change from Environmental Sensitive Zone (next to Kelly Point Park and Smith and Bybee Lakes) to an industrial zone allowing fossil fuel storage and export to Asia. This would mean that 100 tanker-length trains of volatile propane would be passing through my neighborhood every other day. This would greatly affect the short and long term health of our children and the future of this region.

Equally as important, Portland is developing more sustainable public policies and practices, being recognized as a leader in environmentally sound choices. Please continue to fight for our city, our earth and our future.

Sincerely,

Dennis Karas
