Re: Pembina Pipeline proposed Propane Terminal
Date: April 6, 2015

Please do not approve this project - the Propane Terminal proposed by the Pembina Pipeline Company.

People and communities all up and down the Columbia gorge and beyond to the origins of this product are in danger. Ultimately this is not just about the port and potential economic benefits. I urge you to consider the safety and welfare of the people and communities all along the tracks where the extraordinarily dangerous propane would be transported if this project is allowed to go forward.

Railroads average two derailments every million miles. Propane is extremely subject to catastrophic scale explosions. It is incredible to think the company would even consider sending this product through towns and cities and it's the last thing we need in Portland.

As the mother of a firefighter I shudder to think of the extreme danger this project poses to our fire departments that would have to respond to such explosions.

Sincerely,

Rachel Lileet-Foley
