Foreword from Housing Commissioner Dan Saltzman

Dear Portlanders –

This first annual *State of Housing Report* is a comprehensive look at Portland’s housing market, integrating the most current private and public data available. This report and those that follow are intended to help inform policy decisions by providing timely, meaningful information on what is occurring in the market now as well as its impact to Portlanders of different races, ethnicities, family compositions, and income levels.

This report also includes metrics on the work the Portland Housing Bureau does to create and preserve affordable housing. A cursory glance at this report and you’ll understand the dire need to increase affordable housing stock throughout the city.

As Portland continues to grow, I am committed to making sure everyone and every neighborhood shares in the prosperity Portland is enjoying at this moment. All of our residents should be able to live and succeed here—regardless of their income level, race, or physical ability.

Thank you to staff at the Portland Housing Bureau and in my office for their careful guidance and input on this critical report.

Sincerely,

A handwritten signature in black ink that reads "Dan Saltzman". The signature is written in a cursive, slightly stylized font.

Dan Saltzman
PORTLAND CITY COMMISSIONER

Report Context

Under the direction and guidance of Housing Commissioner Dan Saltzman and Housing Bureau Director Traci Manning, the Portland Housing Bureau presents the first phase of the *State of Housing in Portland 2015 Report*.

The State of Housing in Portland Report will be published each fall to provide elected officials, policymakers, government institutions, community organizations, and other partners with the information to guide discussions and decisions on housing policy and resources.

As the inaugural *State of Housing Report*, the 2015 edition is being published in two phases. Phase one, published in April 2015, presents a detailed framework of the indicators and data that are the foundation for understanding the current housing market by type, geography, and affordability to households based on composition, race, and ethnicity. It also includes a variety of reports that Portland City Council has historically requested related to the housing market. Finally, it has an annual report of the outcomes of the Portland Housing Bureau's programs and portfolio, thereby measuring how current City policy, budgeting, and operations impacts the housing market.

During the next few months, the Bureau will solicit feedback about the efficacy of the report in giving Portland City Council the information it needs to make policy and resource decisions. PHB will also present the report to other stakeholders in the housing system, and request their feedback. Phase two will reflect this feedback, and the report will be produced annually in the fall thereafter.

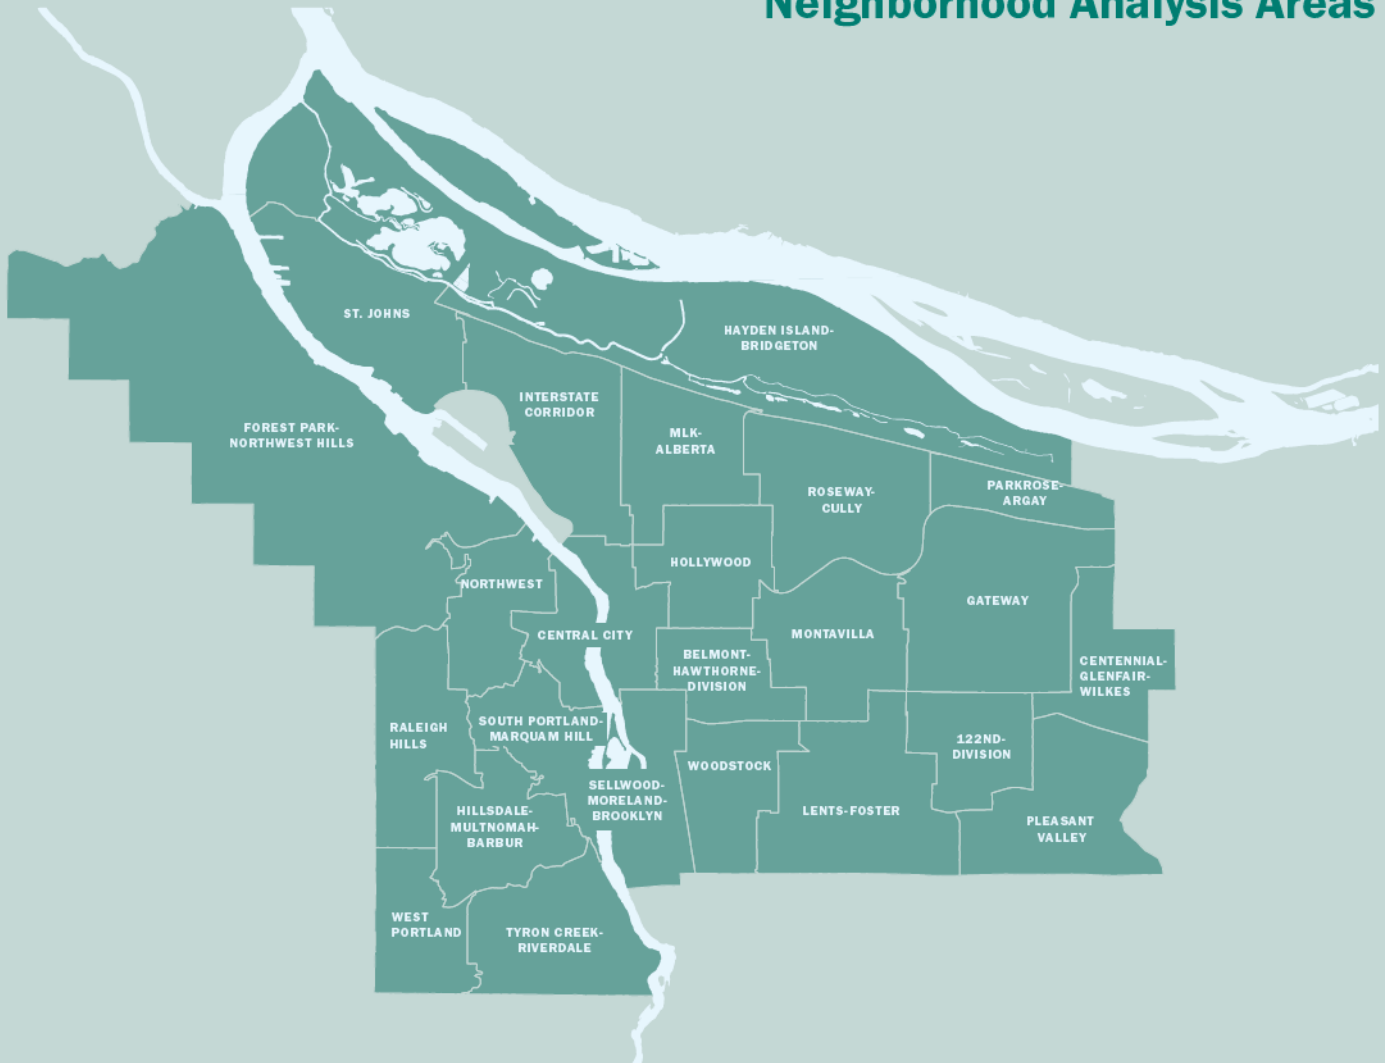

Phase one of the *State of Housing in Portland 2015 Report* blends historic data on households and housing stock with current data on housing production and the rental and ownership

markets. The data is derived from many sources, including the Census Bureau, Multnomah County, Metro, the City of Portland, and several sources of market data. It is important to recognize that these sources are imperfect and routinely undercount vulnerable populations, including Communities of Color. Despite these limitations, the strength of these data sources is that they are updated regularly. To whatever extent possible, the Housing Bureau will work to continuously refine the data sets utilized as it moves forward with this reporting.

The report is divided into 5 parts. Part 1 is an overview of the report context and executive summary. Part 2 presents city-wide data and analysis on population, housing stock, and housing affordability. Part 3 contains data summaries on population and housing indicators divided into neighborhood geographies. Part 4 overviews historic City reporting, City programming and portfolio, and direct expenditure regarding issues related to affordable housing. Part 5 provides a general overview of the methodology and data sources for the report.

The *State of Housing* publication series examines housing data at city-wide and in 24 neighborhood areas. The decision on how to structure the neighborhood levels was driven by two factors: first, the ability to maximize the quality of the data while minimizing margins of error and, second, alignment with the Portland Bureau of Planning and Sustainability. To that end, the 24 neighborhood areas roughly align with those highlighted in the Portland Plan, with some adjustments along census tract boundaries. For more information on data sources and methodology, please refer to Part 5 of this report.

Neighborhood Analysis Areas

Terminology

Housing Stock

The total number of single family and multifamily housing units

Single-Family Unit

Rental and ownership units, including single family homes, duplexes, townhomes, row homes, and mobile homes

Multifamily Unit

Includes rental and ownership units in multifamily buildings

Unit Produced

A housing unit completed and active in the housing stock

Unit Permitted

A housing unit with a permit for construction issued

Regulated Affordable Unit

A housing unit with a regulatory agreement tied to the deed that requires affordability for an established income level for a defined period of time

Executive Summary

Housing affordability in the City of Portland is an issue that has entered the public dialogue. While the Portland housing market is still one of the most affordable of the major West Coast cities, there is a sense of change in the air. The indicators and analysis within this report provide the opportunity to assess policy and programming at new levels of detail and with much more current cost data. Examining production and affordability for various household types and unit compositions will allow more targeted interventions into the housing market.

Somewhat in contrast to what many would expect, the number of housing units produced and added to the city housing stock in 2014 still falls below pre-recession production levels. That said, permitting for multifamily housing units in 2014 matched and exceeded historic levels for the first time since the recession. As the Portland Plan has emphasized, an increasing proportion of residential development in the last decade has been focused on multifamily residential in the Central City and along high-density corridors in neighborhoods throughout the city. This development has been largely driven by multifamily units focused on studio apartments and/or single-bedroom units. By contrast, single-family housing production and construction permitting levels still find themselves below pre-recessionary levels.

However, affordability issues are not only the result of the stagnation in housing production in the years following the recession. As emphasized in recent reports from the Portland City Economist, income inequality and income stagnation continue to hurt working families. Wages, adjusted for inflation, have seen minimal growth in the last two decades. While recent estimates seem to indicate that wages are ticking up slightly as the economy slowly recovers from recessionary impacts, these gains are not shared amongst renter households and Communities of Color. These vulnerable communities continue to see their inflation-adjusted wages fall, while housing costs are growing at rates faster than inflation. This report also highlights the housing challenges for households headed by a single mother. And certainly, for those without income or without housing, the impacts of the market are dramatic.

While the overall composition of racial diversity in the city has remained relatively constant in the last decade, migration and settlement patterns within the city are drastically changing. Communities of Color are increasingly concentrated at the periphery of the city. Affordability estimates in the rental and ownership market reinforce this trend. With disproportionately lower incomes when compared to White households, households of Communities of Color are faced with severely limited choice as they relate to housing.

Housing choice is also increasingly becoming an issue for families in need of more than a single-bedroom housing unit. As the city housing stock is increasingly focused on multifamily housing, affordability estimates for two-bedroom and three-bedroom units in the Central City, or within close proximity, are out of reach for a staggering number of Portland households.

The decline in Federal funding over the past two decades has left the bulk of financing for home ownership and rental housing to local jurisdictions. In Portland that has been heavily Tax Increment Financing, which is restricted geographically to investment in areas that constitute 15% of the city. With housing affordability issues expanding beyond urban renewal areas and the Central City, a structural misalignment exists between the affordable housing goals established by the city and the funding available to implement programming.

Part 2

City-Wide Analysis

Contents

- 12** 2.01 Population, Households & Income
- 19** 2.02 Housing Stock & Production
- 25** 2.03 Rental Housing Market & Affordability
- 39** 2.04 Homeownership Market & Affordability

Section 1

Population, Households & Income

Portland has grown significantly since 2000, adding more than 80,000 individuals and 29,000 households. This population growth most heavily concentrated in the Central City, particularly for smaller households, as well as in some outer east and southeast neighborhoods, particularly for larger households.

African Americans have experienced a slower growth rate than the population as a whole, or that of other Communities of Color, whereas the Hispanic-Latino community has seen the most rapid growth—a 69% increase since 2000.

Median household income has seen meager growth since 2000. While median income levels have increased among homeowners, renter households have seen their economic position weaken. The rebounding of post-recessionary wages among White households has not been shared, and inflation-adjusted incomes of Communities of Color continue to fall.

While Portland's homeownership rate is relatively high compared to other cities of similar size and character, the proportion of the population that occupies an owned home

has declined since 2000. Communities of Color experience a disproportionately low homeownership rate when compared to White households, and the population as a whole.

Although African American and Native American households showed increases in homeownership rates, corresponding income, affordability, and population trends, suggest a decline in the number of renter households in these communities as they are priced out of the city, rather than true increases in homeownership.

Communities of Color are increasingly moving to Outer East and Southeast Portland. North and Northeast Portland have experienced a significant decline in the proportion of Communities of Color since the year 2000.

Finding 2.1.1

Portland's population has increased by more than 80,000 individuals since 2000. African Americans continue to experience a slower growth rate than the population as a whole, or that of other Communities of Color. The most rapidly growing community in Portland is the Hispanic-Latino community, which grew by 69% between the years 2000 and 2013.

Population growth has been most heavily concentrated in the Central City, as well as in the outer east and southeast neighborhoods of Gateway, Pleasant Valley, and Lents-Foster, among others. Minimal growth has occurred in Tryon Creek-Riverdale, West Portland, and Hayden Island-Bridgeton.

Figure 2.1.1 Portland Population: 2000, 2010, and 2013

Source: U.S. Census Bureau - 2000 Decennial Census, 2010 Decennial Census, 2013 1-Year ACS Estimates

Figure 2.1.2 Portland Population Growth by Neighborhood: 2000-2013

Source: U.S. Census Bureau - 2000 Decennial Census, 2013 5-Year ACS Estimates

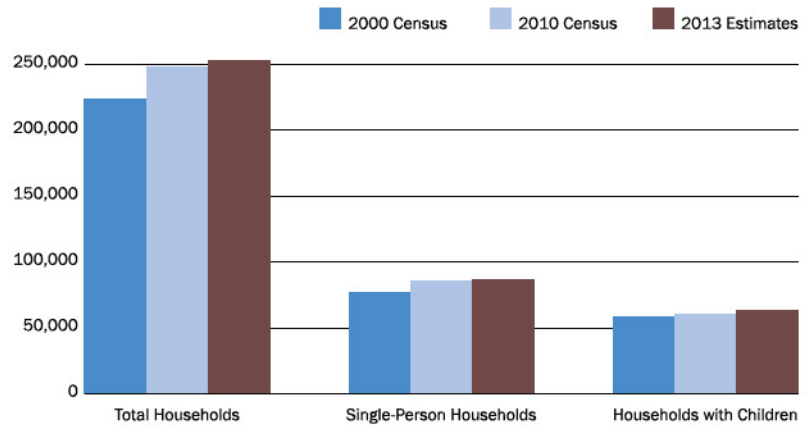

Change in Total Population by Neighborhood, 2000-2013

Finding 2.1.2

The number of households in Portland has increased by more than 29,000 since the year 2000. Single-person households have experienced a growth rate of 12.7%, while the number of households with children has increased by 7.6%.

Like population growth, Portland's household growth has been concentrated in the Central City. Nonetheless, household growth is somewhat more evenly distributed in north, northeast, and outer east, and southeast neighborhoods of the city than population growth has been.

Figure 2.1.3 Portland Households: 2000, 2010, and 2013

Source: U.S. Census Bureau - 2000 Decennial Census, 2010 Decennial Census, 2013 1-Year ACS Estimates

Figure 2.1.4 Portland Household Growth by Neighborhood: 2000-2013

Source: U.S. Census Bureau - 2000 Decennial Census, 2013 5-Year ACS Estimates

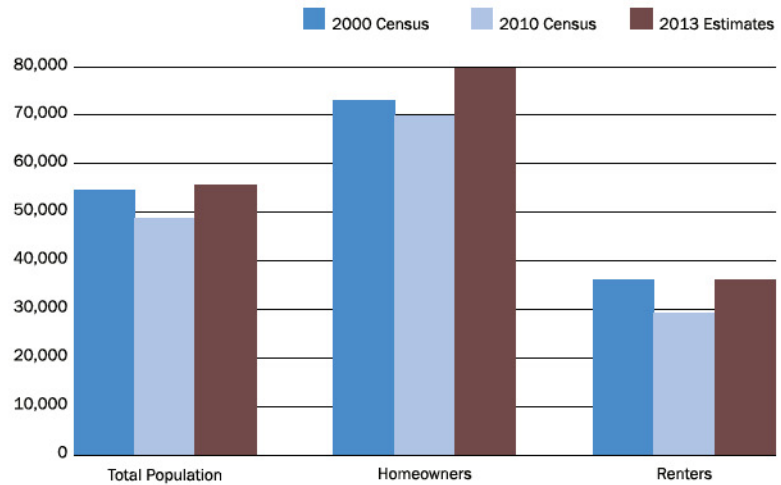

Change in Total Households by Neighborhood, 2000-2013

Finding 2.1.3

After adjusting for inflation, Portland shows meager growth in median household income since the year 2000. As of 2013, the median household income was \$55,571. Real median income levels have increased among homeowners since 2000 and the post-recessionary fall in 2010, while renter households have seen their economic position weaken.

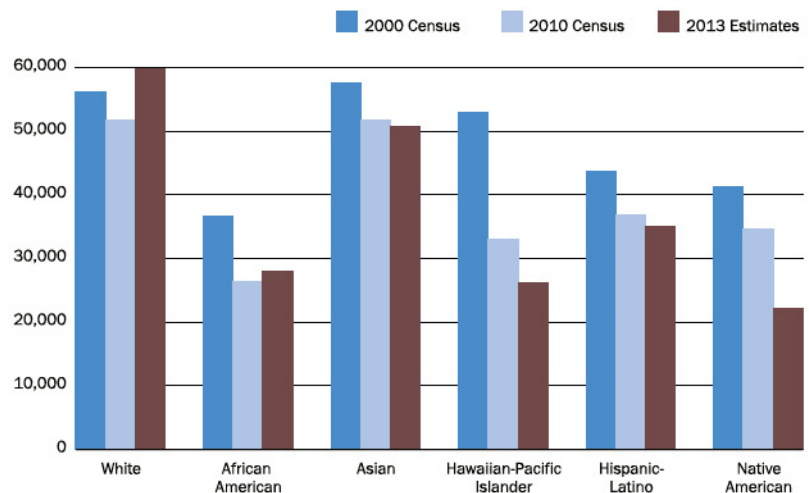

The rebounding of post-recessionary wages among White households has not been shared, and inflation-adjusted incomes continue to fall among Communities of Color. Communities of Color continue to experience disproportionately lower median income levels than that of all Portland households.

Figure 2.1.5 Median Household Income by Housing Tenure, 2013 Adjusted Dollars

Source: U.S. Census Bureau – 2000 Decennial Census, 2010 Decennial Census, 2013 1-Year ACS Estimates

Figure 2.1.6 Median Household Income by Race and Ethnicity, 2013 Dollars

Source: U.S. Census Bureau – 2000 Decennial Census, 2010 Decennial Census, 2013 1-Year ACS Estimates

Change in Median Income by Neighborhood, 2000-2013

Finding 2.1.4

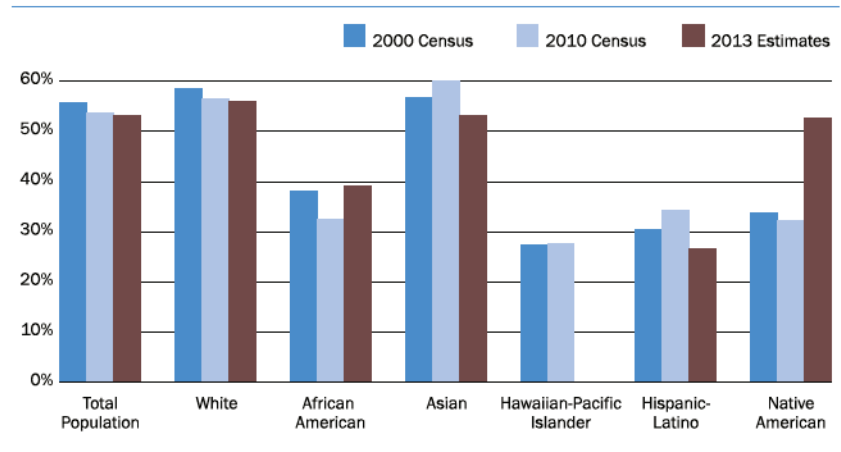

Portland's 53% homeownership rate is relatively high compared with other cities of similar size and character. Nonetheless, the city has experienced a small but steady decline in the proportion of the population that occupies an owned home since the year 2000.

Similar to incomes, Communities of Color experience a disproportionately low homeownership rate when compared to White households, or the population as a whole.

Asian and Hispanic-Latino households have experienced post-recessionary declines in homeownership at more substantial rates than the total population or White households.

African American and Native American households showed increases in homeownership rates between 2000 and 2013. However, when paired with income, affordability, and population trends, this data may reflect that many African American and Native American renter households are, in fact, being priced out of Portland, rather than large increases in homeownership in these communities.

Figure 2.1.7 Homeownership Rate by Race and Ethnicity: 2000, 2010, and 2013

Source: U.S. Census Bureau – 2000 Decennial Census, 2010 Decennial Census, 2013 1-Year ACS Estimates

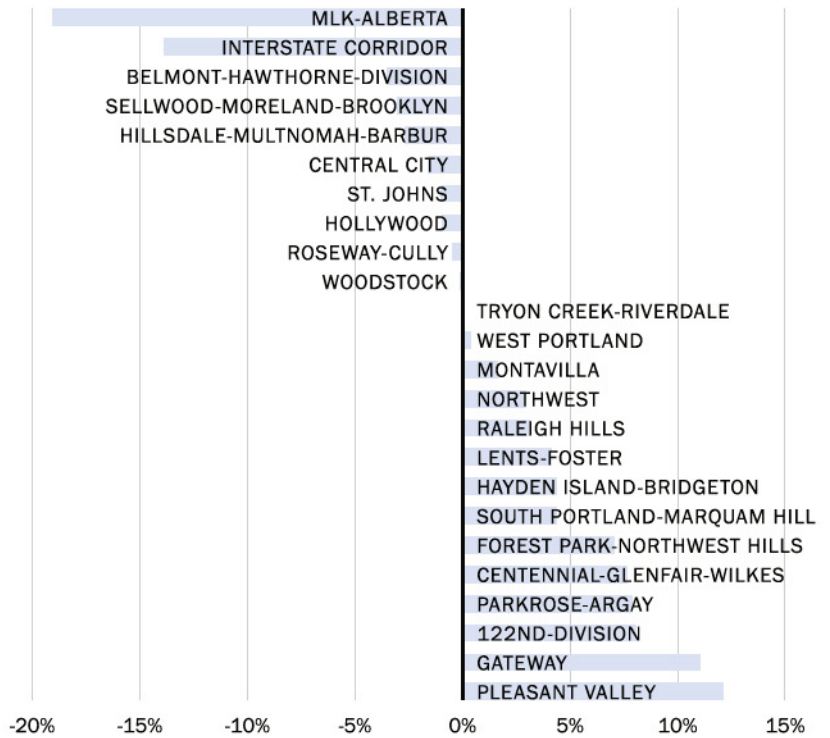

Finding 2.1.5

The change in diversity between neighborhoods, as measured by the change in the proportion of the population that is non-White, between 2000 and 2013 illustrates a significant shift in the racial composition of the city.

Communities of Color are increasingly moving to Outer East and Southeast Portland. North and Northeast Portland have experienced a significant decline in the proportion of the population that consist of Communities of Color since the year 2000.

When examined in the context of the income and affordability data presented in other sections of this report, the change in racial diversity reinforces that many households from Communities of Color are being priced out neighborhoods in close proximity to the Central City.

Figure 2.1.8 Change in Racial Diversity by Neighborhood, 2000-2013

Source: U.S. Census Bureau – 2000 Decennial Census, 2013 5-Year ACS Estimates

Change in Racial Diversity by Neighborhood, 2000-2013

- 4.38 - 12.12%
- 1.63 - 4.37%
- 1.57 - 1.62%
- 13.84 - -1.58%
- 19.06 - -13.85%

Finding 2.1.6

In 2013, 2,869 people were homeless at a point-in-time in Portland and Multnomah County, a rate of 37.79 per 10,000 people in the general population. The Point-in-Time Count is a tally of sheltered and unsheltered homeless persons on a single night in January. HUD requires that communities conduct an annual count of homeless persons in emergency shelter or transitional housing (time-limited housing with services for people exiting homelessness). Communities must also conduct a count of unsheltered homeless persons every other year (odd numbered years). Each count is planned, coordinated, and carried out locally.

People of color are over-represented within the homeless population compared with the general population of Portland and Multnomah County. The extent of the over-representation varies by community. All communities of color except Asians are over-represented, with the greatest levels of over-representation among Native Americans and African Americans.

Figure 2.1.9 Individuals Experiencing Homelessness by Race & Ethnicity: 2011 and 2013

Source: 2013 Point-In-Time Count of Homelessness in Portland/Multnomah County Oregon

Section 2

Housing Stock & Production

As has been the trend for more than a decade, new additions to the city housing stock are increasingly focused on multifamily development, with 1,828 multifamily units added in 2014, compared to 686 single-family units.

While single-family and multifamily development have increased in recent years, annual production has not yet reached pre-recessionary levels. That said, multifamily permitting in 2013 (2,619 units) and 2014 (4,236 units) were at all-time highs. Assuming the majority of these units are built, production levels will soon surpass those in the early 2000s. In contrast, the number of single-family permits issued in 2013 (815 units) and 2014 (886 units), are still well below the early 2000s.

Multifamily production was concentrated in the neighborhoods surrounding the Central City: Northwest, Interstate Corridor, Belmont-Hawthorne-Division, and St. Johns.

Permitting was concentrated in the Central City, followed by Northwest and Interstate Corridor. A total of 1,800 new units were permitted in 2014. Single-family production and permitting, instead, were concentrated in Interstate Corridor, Lents-Foster, MLK-Alberta, and St. Johns.

Between 2000 and 2011, the number of regulated affordable units in the city increased from more than 12,700 to almost 20,000 units. Of the metro region's last count of regulated units, 65% were funded in part by the City of Portland.

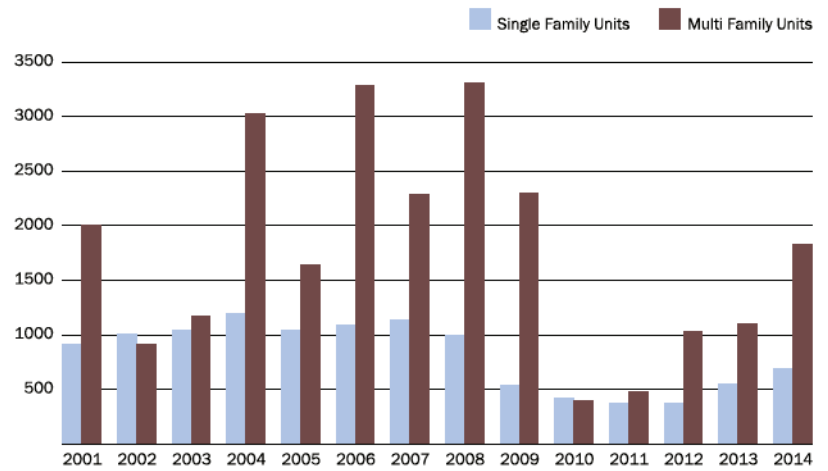

Portland's regulated affordable housing unit stock continues to be heavily concentrated in the Central City.

Finding 2.2.1

Portland continues to experience increases in the number of housing units in the city-wide stock, with 686 single-family units and 1,828 multifamily units added in 2014. As has been the trend for more than a decade, new additions to the city stock are increasingly focused on multifamily development. In 2014 the composition of housing stock in Portland consisted of 152,822 single-family homes and 120,177 multifamily homes.

While the addition of single-family and multifamily housing units has increased in recent years, annual production levels have not yet reached pre-recessionary levels.

Figure 2.2.1 Portland Housing Stock: Annual Production, 2001-2014

Source: Multnomah County, Portland Tax Lot Data, 2015

Figure 2.2.2 Portland Housing Stock: Total Units, 2000-2014

Source: Multnomah County, Portland Tax lot Data, 2015

Finding 2.2.2

While multifamily production has not yet reached pre-recessionary levels, multifamily permitting in 2013 and 2014 were at all-time highs. 2,619 multifamily permits were issued in 2013 and 4,236 multifamily permits were issued in 2014. Assuming the majority of these go on to be built, production levels will soon surpass those in the early 2000s.

Finding 2.2.3

Similar to multifamily production, single-family production is well below pre-recessionary levels. In contrast to the multifamily market, the number of single-family permits issued in 2013 and 2014—at 815 and 886 respectively—are still well below the early 2000s.

Figure 2.2.3 Portland Housing Stock: Multifamily Permits and Production, 2001-2014

Source: City of Portland, Bureau of Development Services; Multnomah County, Portland Tax Lot Data, 2015

Figure 2.2.4 Portland Housing Stock: Single-Family Permits and Production, 2001-2014

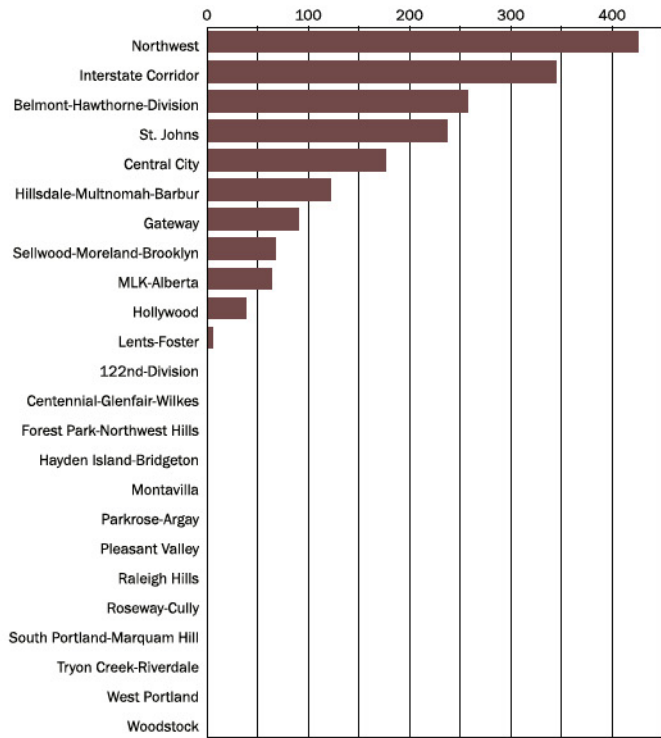

Source: City of Portland, Bureau of Development Services; Multnomah County, Portland Tax Lot Data, 2015

Finding 2.2.4

Multifamily production in 2014 was concentrated in the neighborhoods surrounding the Central City. Northwest, Interstate Corridor, Belmont-Hawthorne-Division, and St. Johns saw the bulk of new multifamily units added to the city housing stock.

Multifamily permitting in 2014 was substantially concentrated in the Central City with nearly 1,800 new permits issued. In addition to the Central City, construction and production is expected to continue in Northwest and Interstate Corridor as over 1,100 permits were issued between the two neighborhoods.

Figure 2.2.5 Portland Housing Stock: Multifamily Unit Production by Neighborhood, 2014

Source Multnomah County, Portland Tax lot Data, 2015

Figure 2.2.6 Portland Housing Stock: Multifamily Unit Permits by Neighborhood, 2014

Source City of Portland, Bureau of Development Services, 2015

Multi-Family Permitting in 2014

Finding 2.2.5

Single-family production in 2014 was concentrated in Interstate Corridor, Lents-Foster, MLK-Alberta, and St. Johns. In addition, most neighborhoods in the city experienced a minimal level of single-family production over the course of the year.

Single-family permitting in 2014 has been relatively distributed throughout most neighborhoods in the city, with more substantial permitting continuing in Interstate Corridor, Lents-Foster, MLK-Alberta, and St. Johns. In addition, Woodstock and Montavilla have experienced higher levels of permitting that may yield higher numbers of single-family production.

Figure 2.2.7 Portland Housing Stock: Single-Family Unit Production by Neighborhood, 2014

Source: Multnomah County, Portland Tax lot Data, 2015

Figure 2.2.8 Portland Housing Stock: Single-Family Unit Permits by Neighborhood, 2014

Source: City of Portland, Bureau of Development Services, 2015

Single-Family Permitting in 2014

Finding 2.2.6

Between 2000 and 2011, the number of regulated affordable units in the city increased from more than 12,700 to almost 20,000 units. Of the total regulated units in the Metro 2011 Regional Inventory of Regulated Affordable Housing, more than 12,500 were in part funded by the City of Portland. Portland's regulated affordable housing unit stock continues to be heavily concentrated in the Central City, with more than 7,000 of the city's almost 20,000 regulated units.

Household Profile

A household type to show how homeownership affordability varies among different populations in Portland.

Household Data

Currently available data for each household type.

Data Source: ACS 2013 1-Year Estimates

Affordability Estimates

Median home sales price and estimates of homeownership affordability by neighborhood. Monthly homeownership cost estimates are based on mortgage cost. Affordability was determined by whether the homeownership cost exceeded 30% of the median income for that household type, not including taxes, insurance, or utilities.

Data Source: ACS 2013 1-Year Income Estimates, PHB, and RMLS 2015

Neighborhood

Area of the city being profiled in the data summary.

Population and Income

Neighborhood population, median household income, and poverty rate by race and ethnicity in the years 2000 and 2013.

Neighborhood households (all, single and with children), foreign-born individuals, persons experiencing disabilities, and seniors in the years 2000 and 2013.

Housing Stock and Production

Neighborhood housing stock disaggregated into single-family and multifamily units, regulated affordable housing units, and production values through single-family and multifamily permitting data in the years 2000, and 2010 to 2014.

Housing Market and Affordability

Estimates of the rental affordability of multifamily rental units in Portland neighborhoods by unit type. Median rent and vacancy rate data assessed through market survey analysis. Affordability assessed through a comparison test on whether the median rent exceeded 30% of that household's median income.

Estimates of the homeownership affordability in Portland neighborhoods. Median home sales prices assessed through RMLS. Monthly homeownership cost estimates based on mortgage cost. Affordability assessed through a comparison test on whether the homeownership cost exceeded 30% of that household's median income.

Section 1

Reporting

Central City No Net Loss

Policy

The City of Portland will maintain no less than 8,286 rental housing units affordable to households who earn from 0-60% of the median family income within Central City.

Background

Central City No Net Loss is a policy adopted by City Council in August of 2001 with Resolution 36021. The policy mandates that either through preservation or replacement, the City will maintain the number of units that were affordable at 60% MFI and below in 2002, according to the baseline established in a 2002 Central City housing inventory. The 2002 Central City housing inventory estimated there were 8,286 rental units affordable at 60% of the Median Family Income and below in the Central City.

Status

The City of Portland is currently not meeting the goal of the Central City No Net Loss Policy. A recent unit survey identified 6,551 rent-regulated units and 267 market-rate units affordable at 60% MFI. While the number of regulated affordable units has increased by 647 units since 2008, the Central City has seen continued loss of affordability in market-rate units. The majority of affordable units in both regulated and market-rate properties are smaller units serving one- and two-person households. Family-sized affordable units are limited.

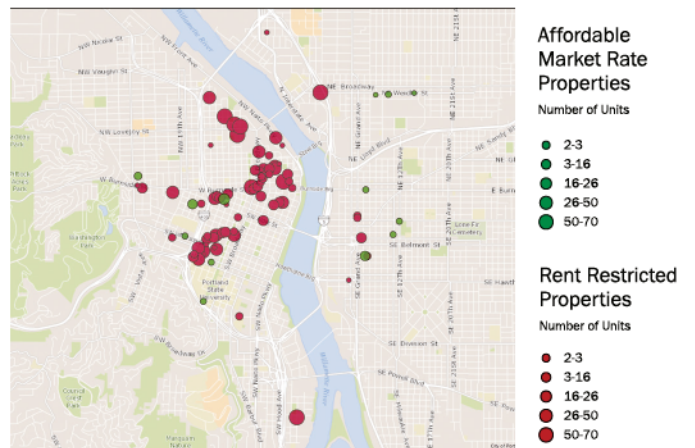

Market-Rate Units Affordable at 60% MFI

Rent-Regulated Units Affordable at 60% MFI

Central City Rental Units Affordable at 60% MFI

Tax Increment Financing Set Aside

Policy

An aggregate city-wide minimum of 30% of Tax Increment Financing shall be dedicated to the development, preservation, and rehabilitation of housing affordable to households with incomes below 100% of the Median Family Income.

Background

Tax Increment Financing Set Aside is a policy adopted by City Council in April of 2006 with Resolution 36404. The policy mandates that an aggregate city-wide minimum of 30% of urban renewal area tax increment financing be dedicated to the development, preservation, and rehabilitation of housing affordable to households with incomes below 100% of the Median Family Income.

Status

As of the close of the 2013-14 fiscal year, the City was currently meeting the minimum 30% Tax Increment Financing Set Aside goal, as well as the below-100% Median Family Income goal.

Section 2

Programming

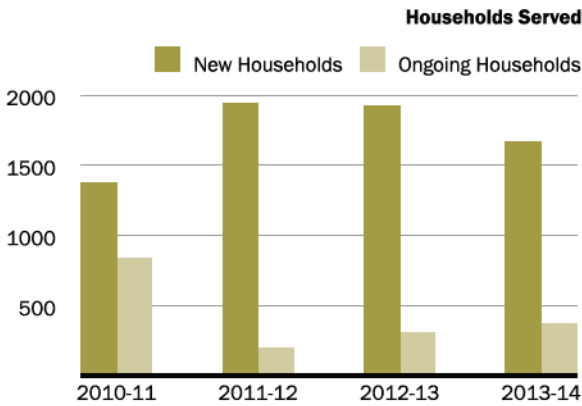

Homelessness

The Portland Housing Bureau funds programs designed to prevent and end homelessness for individuals and families. These programs are provided through contracts with various nongovernmental and other public entities, who perform a range of services. These services include short-term rent assistance, eviction prevention and housing placement, emergency shelter, and transitional housing.

Long-Term Assisted Housing with Supportive Services

Short-Term Rent Assistance & Eviction Prevention

Program Utilization by Race & Ethnicity

Homeownership & Home Repair

The Portland Housing Bureau funds and operates programs designed to increase and retain home ownership for individuals and families. These programs are operated by Bureau staff and provided through contracts with various nongovernmental and other public entities, who perform a range of services. These services include home repair, homebuyer education and assistance, down payment assistance, and foreclosure prevention counseling.

Homebuyer Education

Grants for Minor Home Repairs

Loans for Home Repairs

Downpayment Assistance Loans

Program Utilization by Household Income

Program Utilization by Race & Ethnicity

Affordable Housing Property Tax Exemption

The Portland Housing Bureau manages tax exemption programs designed to increase the number of affordable rental units in the housing stock. These programs are operated by Bureau staff. These exemptions include the multifamily limited tax exemption, the homeowner limited tax exemption, and the non-profit limited tax exemption.

Asset Portfolio Production & Loss

Asset Portfolio Total Units

Asset Portfolio Affordability Composition

Multifamily Production, Preservation & Rehabilitation

The Portland Housing Bureau manages a balance of funds designed to increase the number of affordable rental units in the housing stock. These funds are managed and dispersed by Bureau staff to private and non-profit organizations in exchange for unit production.

Section 3

Direct Expenditure

Homelessness & Housing Direct Expenditure

Homelessness

Rental Housing

Homeownership

Outlined here are total direct expenditures associated with each program area of the Portland Housing Bureau, year over year, from 2010 to 2015. The funds have been categorized as General Fund, Federal Fund, Tax Increment Financing, and Other Local Funds. General Fund is spent primarily on homelessness programs while homeownership and multifamily rental housing are supported primarily with Federal funds and Tax Increment Financing.
