Purpose of proposed legislation and background information:

The purpose of this ordinance is to amend an existing contract with Gillespie, Prudhon & Associates, Inc. (GP&A) for on-call radio system design, to extend the term through December 31, 2016 at a not to exceed cost of \$80,000. This work is vital to the continuance of the Walter's Hill Radio Site Upgrade Project. GP&A worked with the City on preparation of the Land Use application and they are currently assisting the City of Portland in obtaining a building permit from the City of Gresham. GP&A staff acted as the Engineer of Record for the 55 documents submitted. They must be available to answer questions from the City of Gresham and from the construction low bidder. There are five Engineers of Record on this project and city staff needs to have access to them throughout this process. Completion of the Walters Hills site is critical to the final design of the pending PSSRP - P-25 digital radio system.

This Ordinance will not change specific City policies.

Financial and budgetary impacts:

- No budgetary appropriation changes are required as a result of this action.

Community impacts and community involvement:

- Failure to complete the Walters Hill radio site project could have community impact in East County/Gresham. The Walters Hill radio site is in need of updating/renovation. Failure to complete these renovations could impact reliability of the critical public safety radio site. Any site outages could impact Police, Fire and Medical response times and procedures.
- No community involvement needed as a result of this action.
