Contact name: Patrick Kramer

Contact phone: 503-865-2489

Presenter name: Patrick Kramer

Purpose of proposed legislation and background information:

The Contract for Vehicle Towing and Storage is a service contract utilized by the Agencies such as Portland Police, Parking Enforcement, Tri-Met, Portland Streetcar, Inc. and others for towing services. For this current contract, Portland Streetcar, Inc. (PSI) requested a change to the previous payment policy by which PSI paid the cost of each tow from the streetcar tracks. This change was inadvertently left out of the most recent contract. The amendment clarifies that the owner of the illegally parked vehicle is now responsible for the cost of towing.

The Towing Board of Review has approved the recommendation to change this PSI tow procedure on May 27, 2014.

Financial and budgetary impacts:

Approval of the change to PSI policy will result in cost savings related to the towing of illegally parked vehicles blocking the streetcar tracks.

Community impacts and community involvement:

This change was discussed at a Towing Board of Review meeting. This meeting was open to the public.
