

**IMPACT STATEMENT**

**Legislation title:** Accept Engineer's Report on Portland State University Sky-bridge Extension Encroachment (Ordinance)

**Contact name:** Robert Haley

**Contact phone:** 3-5171

**Presenter name:** Robert Haley

**Purpose of proposed legislation and background information:**

The legislation allows for PSU to construct, own, and maintain a Sky-Bridge extension of an existing Major Encroachment to connect PSU's Schools of Business Administration and Education to the existing skybridge within the SW Montgomery Street ROW.

The Portland Design Commission also issued a formal recommendation for approval of the Major Encroachment.

The Engineer's report contains PBOT's review and analysis of the proposal's conformance with existing policy documents and recommends allowance of these Major Encroachments.

**Financial and budgetary impacts:**

Staff time for preparation of documents and participation in Design Review occurs on a cost-recovery basis through the City's permitting and development process.

**Community impacts and community involvement:**

PBOT followed the proscribed Major Encroachments process. Because this development project requires Design Review, the project was also the subject of Portland Design Commission meetings. The proposal received a formal recommendation from the Portland Design Commission accepting the encroachments.

**Budgetary Impact Worksheet****Does this action change appropriations?**

☐ **YES:** Please complete the information below.
