Subject: Public comment on proposed parking changes in Portland NW

Dear PSC,

I am writing to oppose the proposed minimum parking requirements for new buildings of at least 30 units. Parking and vehicles are privileges, not rights that should be required for implementation by builders.

The proposed rules would encourage more congestion and would be bad for the environment. Public transportation and active transportation options such as bicycling should be expanded instead of requiring a minimum number of parking spaces for large buildings.

Thank you for reading my comments,
