

IMPACT STATEMENT

Legislation title: Authorize Amendment #1 of the Intergovernmental Agreement with Oregon Department of Transportation for design of the Burgard/Lombard at North Time Oil Road project. (Ordinance; amend Contract No. 30003916)

Contact name: Winston Sandino, PBOT Project Manager

Contact phone: 503-823-5767

Presenter name: Winston Sandino, PBOT Project Manager

Purpose of proposed legislation and background information:

The project originally was going to be bid through the Oregon State Department of Transportation, (ODOT) because Lombard Street is on the National Highway System (NHS). The City requested approval to bid and construct this project through the certification program. This amendment will allow the City of Portland Bureau of Transportation to bid this project. There is no impact to the schedule or budget for the project.

Financial and budgetary impacts:

The project is completing the design phase and it is ready to move to the bidding process soon. We have received funding for design, ROW and construction in a previous IGA (Ordinance No. 186503) and has been allocated for FY 15-16. We are just certifying the project. This IGA will not create new positions.

Community impacts and community involvement:

This area within the project limits is 100% industrial or vacant land and we have maintained a close communication with the adjacent business owners.

PBOT has communicated with the community and business owners during the pre-development and design phase.

The Freight Committee has raised concerns about the new proposed multi use path and potential conflicts with trucks. PBOT has paid particular attention to these potential conflicts and has included several warning signs for the trucks and bicyclists.

PBOT has also coordinated and met several times with the Freight committee to give updates on the project design and will continue work communicate during the construction phase closely with property owners as well.
