Subject: PSC Fossil Fuel Zoning Testimony

Dear Planning and Sustainability Commission:

It seems that original proposal to not allow new fossil fuel infrastructure in Portland was revised to allow more terminals after all, and then revised with modifications that still favor the dirty energy's agenda to expand their terminals. We need be moving forward with alternative energy, not constantly kowtowing to the dirty energy industry as they recklessly destroy our planet for bigger and bigger profits.

Therefore I urge the City of Portland to amend the proposed draft to reflect the city's fossil fuel goals: Enact a FULL ban on all new fossil fuel terminals, large or small. An exception for new facilities that are 5 million gallons or less is unnecessary. The City's code changes should not allow more unit trains of dangerous fossil fuels like Bakken crude oil. Strengthen restrictions on expansions allowed at existing terminals by adding binding limits as well as criteria for safety and climate impacts in the City's non-conforming use review process. Prevent any aggregate increase in fossil fuel infrastructure in Portland.

Please stick to your original proposal and make Portland a leader in alternative energy and put the dirty energy industry on notice that they are not welcome there.

Sincerely,  
Gayle Janzen
