Purpose of proposed legislation and background information:

The purpose of this GA is to provide project management and administration for the construction of 14 sleeping pod emergency transitional housing units built by local architecture firms and groups, in an effort to explore micro-housing strategies for temporary emergency shelter.

The 14 different sleeping pod design prototypes developed from the discussions of a design charrette hosted by the Center for Public Interest Design, a research and action center within Portland State University. The designs are intended to be easily replicated, sourced, and moved in response to the climate and the availability of land for temporary, Open Space "Pop-Up" Shelter as defined by the Safety Off the Streets workgroup within A Home for Everyone. The intent is for the sleeping pods to be donated to a local organization(s) that will be able to take advantage of previously unused land to provide temporary housing options.

Financial and budgetary impacts:

This funds were allocated in the Campsite Services program, within the Bureau of Internal Business Services, budget in the Office of Management & Finance Mayor's Office Budget for FY 16-17.

Community impacts and community involvement:
