Green Street Examples

Green Street Steward Program

Green streets filter stormwater to protect our rivers and streams. The city keeps Green Streets working and welcomes your help with care and

cleaning.

The Green Street Steward's Maintenance Guide

Green Streets

are landscaped spaces that transform street surfaces into living stormwater management facilities. Green streets capture stormwater runoff and let water soak into the ground as plants and soil filter pollutants. Green Streets convert stormwater from a waste directed into a pipe, to a resource that replenishes groundwater supplies and protects urban watershed health. They also create attractive streetscapes and urban green spaces, provide natural habitat, and enhance pedestrian and bicycle safety.
