Subject: Title11

Please consider our air quality and the awful days of smoke and smog that we experienced too too often in Portland.

Trees are here and will help with the job if you take a stand. Our tree canopy is pretty destroyed, take a look at old photos from the 80sand 90s.

Save Portland's trees and air. Little replacement trees can't do much.

It's one thing that can be done to meet our climate goals.

Leave our trees in place.

Bad air is even harder on poor and people without homes. You claim to care about our vulnerable people but side with developers.

Wake up! You can kill the city if we can't live well here.
