

PETITION TO SAVE THE TREES AT SOUTH PARK BLOCKS

The trees at South Park Blocks need your help now! Do you love walking under the canopy of those 100ft. tall Elm trees? Currently they are under threat by a Portland city council Green Loop and "tree succession plan" which would destroy 25% of these stately trees. This plan would add an asphalt path through the park and also add a bike path inside the western edge of the park which would damage the roots of any trees that are spared.

These magnificent trees have been good neighbors for over 100 years and multiple generations have enjoyed their presence. We don't want our generation to be the last one to walk under their amazing canopy.

We formally petition that Portland City Council stop this project.
