

INNOVATION/OTHER PROJECT FORM – DRAFT

This information helps us understand the energy and greenhouse gas (GHG) impacts of the proposed project. Please answer all questions that are applicable to your project. Narrative boxes will expand so please use as much space as needed to provide the information requested.

1. Describe how the project will reduce or sequester GHG emissions

Narrative response

2. What type(s) of fuel will be displaced/saved, if applicable?

Narrative response

3. Provide an estimate of how much of each type fuel will be displaced/saved on an average annual basis including unit (e.g. 500 kWhs per year, 100 gallons of gas per year).

Narrative response

4. What is the estimated life of the project; how many years are the GHG emissions savings expected to last?

Narrative response

5. Describe the baseline assumptions about consumption of fuel(s) that will be displaced/saved using the same units as above.

Narrative response
