APPEAL SUMMARY

Status: Decision Rendered- Reconsideration of ID 22076

Appeal ID: 22128	**Project Address:** 733 SW Oak St
Hearing Date: 11/20/19	**Appellant Name:** Mike Coyle
Case No.: B-004	**Appellant Phone:** 5036805497
Appeal Type: Building	**Plans Examiner/Inspector:** Guy Altman
Project Type: commercial	**Stories:** 3 **Occupancy:** B **Construction Type:** V-A
Building/Business Name: Balfour Guthrie Building / Metropolitan Group (occupant)	**Fire Sprinklers:** Yes - basement level
Appeal Involves: Alteration of an existing structure,Reconsideration of appeal	**LUR or Permit Application No.:** 19-233552-CO
Plan Submitted Option: pdf [File 1] [File 2] [File 3] [File 4] [File 5]	**Proposed use:** Business

APPEAL INFORMATION SHEET

Appeal item 1

Code Section	OSSC 2019 1019.3
Requires	In other than Group I-2 and I-3 occupancies, floor openings containing exit access stairways that serve or atmospherically communicate between only two stories are not required to be enclosed as described in Exception 1. In this building, the south stair serves only two adjacent floors (first and second levels). The stair within the tenant space that connects the first level with the lower level also serves just two adjacent floors. These two “environments” are separated by the walls separating the tenant area from the main south lobby. Therefore the “environments” do not communicate and the Code requirement appears to be satisfied. However, in cases where the two “environments: rely on a common route to exit the local building official has traditionally interpreted the Code to require that this separating wall be rated one-hour.
Proposed Design	We propose that the wall between the main (south) lobby and the tenant space on level 1 be a non-rated wall, but that the doors have automatic closers and smoke seals.
Reason for alternative	Functionally it is desirable to make the wall between the main lobby and the tenant reception area as transparent as possible. To achieve both transparency and a one-hour rating would be cost prohibitive. We believe that the proposed separation meets the Code and is adequate and safe. The transparency, furthermore, makes the presence of any smoke or fire more apparent than a traditionally rated wall and would indicate to occupants that they should use an alternate exit route. Note that a similar appeal was granted in 2001, associated with permit #01-152908-CO. In

addition, it is worth noting that the basement level is sprinklered and there is no Change of Occupancy proposed with this permit.

RECONSIDERATION TEXT

Note that the same appeal was granted without condition in 2001 for a fully glazed wall system with full lite doors within this building and in the same location, associated with permit #01-152908-CO at 733 SW Oak St. That appeal is attached (See item #2 for the specific appeal item).
In addition, it is worth noting that the basement level is sprinklered and the building is equipped with a fire alarm and smoke detection system in accordance with NFPA 72. The fire sprinkler system is electronically supervised and centrally monitored.

APPEAL DECISION

Non-rated openings into south stair enclosure: Granted as proposed.

The Administrative Appeal Board finds that the information submitted by the appellant demonstrates that the approved modifications or alternate methods are consistent with the intent of the code; do not lessen health, safety, accessibility, life, fire safety or structural requirements; and that special conditions unique to this project make strict application of those code sections impractical.

Pursuant to City Code Chapter 24.10, you may appeal this decision to the Building Code Board of Appeal within 90 calendar days of the date this decision is published. For information on the appeals process, go to www.portlandoregon.gov/bds/appealsinfo, call (503) 823-7300 or come in to the Development Services Center.

Appeal item 1

Code Section 1019.3

Requires In other than Group I-2 and I-3 occupancies, floor openings containing exit access stairways that serve or atmospherically communicate between only two stories are not required to be enclosed as described in Exception 1.

In this building, the south stair serves only two adjacent floors (first and second levels). The stair within the tenant space that connects the first level with the lower level also serves just two adjacent floors. These two "environments" are separated by the walls separating the tenant area from the main south lobby. Therefore the "environments" do not communicate and the Code requirement appears to be satisfied.

However, in cases where the two "environments: rely on a common route to exit the local building official has traditionally interpreted the Code to require that this separating wall be rated one-hour.

BUILDING PROPOSED DESIGN

We propose that the wall between the main (south) lobby and the tenant space on level 1 be a non-rated wall, but that the doors have automatic closers and smoke seals.

REASON FOR ALTERNATE

Functionally it is desirable to make the wall between the main lobby and the tenant reception area as transparent as possible. To achieve both transparency and a one-hour rating would be cost prohibitive. We believe that the proposed separation meets the Code and is adequate and safe. The transparency, furthermore, makes the presence of any smoke or fire more apparent than a traditionally rated wall and would indicate to occupants that they should use an alternate exit route.

Note that a similar appeal was granted in 2001, associated with permit #01-152908-CO. In addition, it is worth noting that the basement level is sprinklered and there is no Change of Occupancy proposed with this permit.

RECONSIDERATION TEXT

Note that the same appeal was granted without condition in 2001 for a fully glazed wall system with full lite doors within this building *and* in the same location, associated with permit #01-152908-CO at 733 SW Oak St. That appeal is attached (See item #2 for the specific appeal item).

In addition, it is worth noting that the basement level is sprinklered and the building is equipped with a fire alarm and smoke detection system in accordance with NFPA 72. The fire sprinkler system is electronically supervised and centrally monitored.

Appeal Number B-4

Owner:	Balfour-Guthrie LLC
Appellant:	Dave Shelman, 503-227-1254 FAX: 503-227-7818
Plan Reviewer:	Jerry Engelhardt
Permit Number:	01-152908-000-00-CO
Stories/Occ/Type:	2 / B / V-1 hr
RE:	Alteration of/addition to an existing structure
Proposed Use:	Office Building
Project Address:	**733 SW Oak St**

1. BUILDING CODE SECTION: 1005.3.3

BUILDING REGULATION REQUIREMENT

Specific requirements in exit enclosures:

1005.3.3.1: Interior stairways, ramps or escalators shall be enclosed as specified in this section.
1005.3.3.2: In buildings of other than Type I or Type II-F.R. construction and less than four stories in height, exit enclosures shall not be of less than one-hour fire-resistive construction.
1005.3.3.5: Openings in exit enclosures shall be limited to those necessary for egress from normally occupied spaces into the enclosure and those necessary for egress from the enclosure.
EXCEPTION: Exit enclosures on the exterior walls of buildings may have unprotected openings to the exterior when permitted by Table 5-A.

BUILDING PROPOSED DESIGN

We propose to include wood-framed relites and a wood door with view lite in the wall separating "Studio 2" from the Stair 2 enclosure. We also propose the installation of a fire shutter that would be mounted on the stair side of the relite openings. This shutter would be held open under normal operation of the building and would close in the event of activation of the fire alarm system. We propose to specify a one-hour rating (label) for door 202. The door will have a view lite larger than 96 square inches. The glass in this opening will have a fire rating. The rated door and the fire shutter maintain the required one-hour rating of the stair enclosure.

REASON FOR ALTERNATE

Glazed windows and door would allow us to maximize the amount of daylight that is available on the first level and especially on the lower level. The lower level receives its daylight through a cutout in the floor of the first level. The existing exterior windows are permitted per Table 5-A due to separation from adjacent structures. Due tot he historic nature of the building, we would like to construct these openings of wood and clear, non-wire glass.

2. BUILDING CODE SECTION: 1005.3.3.1

BUILDING REGULATION REQUIREMENT

Exit enclosures for stairs. Under "EXCEPTIONS" this is defined further, stating that stairs need not be enclosed when serving just one adjacent floor, provided that any two "atmospherically connected" floors do not communicate with other floors.

In this building, Stair 1 serves just two adjacent floors (first and second levels). The stair within the tenant space that connects the first level with the lower level also serves just two adjacent floors. These two "environments" are separated by the walls separating the tenant area from the main lobby 201. Therefore the "environments" do not communicate and the Code requirement appears to be satisfied.

However, in cases where the two "environments" rely on a common route to exit the local building official has traditionally interpreted the Code to require that this separating wall be rated one-hour.

BUILDING PROPOSED DESIGN

We propose that the wall between the main lobby 201 and the tenant space (reception 202) be a non-rated wall, but that the doors have automatic closers and smoke seals.

REASON FOR ALTERNATE

Functionally it is desirable to make the wall between the main lobby and the reception area as transparent as possible. This also restores the historic pattern of the original building. To achieve both the transparency and a one-hour rating would be cost-prohibitive. We argue that the proposed separation meets the Code and is adequate and safe. The transparency makes the presence of any hazards such as smoke or fire more apparent and would indicate that occupants should use an alternative exit route.

3. BUILDING CODE SECTION: 1005.3.3.4

BUILDING REGULATION REQUIREMENT

Requires that when a stairway in an exit enclosure continues below the grade level, a barrier be provided to prevent persons from accidentally continuing tot he basement.

BUILDING PROPOSED DESIGN

We are proposing to not install a barrier in exit enclosure "stair 2".

REASON FOR ALTERNATE

The building is an historic building. Stair 2 has the wood paneling and wrought iron railing of the original 1913 design. As the attached drawings show, the stair enclosure has many windows to the exterior, that orient the occupants to the outside of the building. The at-grade landing occurs adjacent to the pair of exit doors. The doors are full-view doors that give a clear view of the exterior environment. We think that the indications for those needing to exit the building in an emergency are sufficient enough to preclude the need for a barrier. Directional signs will be provided as required.

Appeal Number B-4 **(Continued)**

4. BUILDING CODE SECTION: 1004.2.4

BUILDING REGULATION REQUIREMENT

Requires that where 2 or more exits are required to serve an area, that at least 2 of these exits be separated by a distance equal to half the greatest diagonal measured across the space being served.

BUILDING PROPOSED DESIGN

A primary element of the proposed design is a large opening cut into the first level floor. This helps to unite the two levels that are occupied by one tenant. A stair is placed in this new opening to connect the functions of the 2 levels. The staff will use the stair in the normal course of the business day to meet with other staff members, to retrieve mail/deliveries and to enter and leave the building. Guest use of the stair is principally to move between the reception area on the first level and the conference room 1 on the lower level.

REASON FOR ALTERNATE

In planning the space attempts were made to locate the stair in a number of configurations that would give greater separation but these arrangements did not achieve the right functional relationships in the plan—primarily the route to the lower level conference room 1. We think that the openness of the plan and the stair and the position of the conference room (where guests are likely to be) create a safe arrangement. The functions at the ends of the greatest diagonal also have the least occupancy (1 or 2 in the model building area periodically and service personnel only in the mechanical room 120).

The Administrative Staff reviewed the appeal, and the following decision was reached:

1. Openings into stair enclosures: **Denied.**

2. Stair configuration for new stair from basement: **Granted as proposed.**

3. Barrier at stair to basement: **Granted as proposed.**

Appeal Number B-4 **(Continued)**

4. Separation of exits: **Granted provided** basement sprinkler system is maintained per the Fire Marshal's Office and building is provided with a smoke detection system per the Fire Marshal's Office.

- EXISTING ELEMENT TO BE REMOVED
- EXISTING SECTION TO BE REMOVED

GENERAL DEMOLITION NOTES

A. STRIP ALL EXTERIOR PAINT OF SANDSTOME WINDOW FRAMES AND OTHER FACADE ELEMENTS

B. ANCHOR ALL SANDSTONE. SEE STRUCT FOR DETAILS AND LOCATION OF TIES.

C. REMOVE ALL BIRD SPIKES

DEMOLITION KEY NOTES

1. REMOVE FIXTURE, CAP CONDUIT
2. REMOVE CONDUIT, BELL
3. REMOVE INFILL PANELS, VENTS. REPAIR WINDOW FRAMES
4. REMOVE PATTERENED GLASS
5. REMOVE/REPLACE DENTED DENTIL
6. REMOVE/REPAIR DENTED GRATING
7. REMOVE OVERFLOW OF ABANDONED UNIT

EXTERIOR ELEVATIONS — DEMOLITION

Re. Oak Street Building
Portland, OR
City of Portland Application No. (01-152908-000-00-CO)

01 - 152908 BMO CO

Dear Dave,

Following is our response to the Structural Plan Examination by the City of Portland of the above-referenced project. Items are numbered in accordance with the review comments.

Item 1 Calculation for the effect of the new opening in the first floor slab diaphragm is enclosed in pages R-1 thru R-4.

Item 2 Steel columns are not part of the primary framing of the building and were added to support concentrated loads due to some equipment. The equipment and their pads have been removed; therefore, removal of these secondary columns does not seem to have any adverse effect on the structure.

We trust the above is satisfactory for your needs. Please do not hesitate to call me if you have any questions.

Sincerely,

Babrak Amiri, P.E.

NOTES

1. THE LOCATION OF THE GAS, ELECTRICAL, WATER AND SANITARY SEWER SERVICE ARE SHOWN AS MARKED BY OTHERS OR AS SHOWN ON "AS BUILT" RECORDS FROM THE CITY OF PORTLAND.
2. BOUNDARY DETERMINATION IS BASED ON MULTNOMAH COUNTY SURVEY RECORDS 10037 AND 30884 AND MONUMENTS FOUND AS SHOWN ON THESE RECORDS.
3. THE ZONING FOR THIS SITE IS CM3 (CENTRAL COMMERCIAL ZONE). THE BUILDING SETBACK LINE FOR THIS ZONE IS 0 FEET. FOR INTERPRETATION OR CLARIFICATION OF THIS ZONING CONTACT BUREAU OF PLANNING, CITY OF PORTLAND AT (503) 823-7526.

SURVEYOR'S CERTIFICATE

THE UNDERSIGNED HEREBY CERTIFIES TO GRAY PURCELL GENERAL CONTRACTORS, CENTENNIAL BANK, WEST COAST BANK AND STEWART TITLE OF OREGON, INC. THAT THIS MAP AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH "MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/ACSM LAND TITLE SURVEYS," JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND ACSM IN 1999, AND INCLUDES ITEMS PURSUANT TO THE ACCURACY STANDARDS AS ADOPTED BY ALTA, NSPS, AND ACSM AND IN EFFECT ON THE DATE OF THIS CERTIFICATION. THE UNDERSIGNED FURTHER CERTIFIES THAT THE SURVEY MEASUREMENTS WERE MADE IN ACCORDANCE WITH THE "MINIMUM ANGLE, DISTANCE AND CLOSURE REQUIREMENTS FOR SURVEY MEASUREMENTS WHICH CONTROL LAND BOUNDARIES FOR ALTA/ACSM LAND TITLE SURVEYS".

TITLE REPORT EXCEPTIONS

1. EXCEPTIONS ARE FROM STEWART TITLE OF OREGON, INC. ORDER NO. 2000160352 DATED FEBRUARY 28, 2001.
2. THE FOOTINGS AND APPURTENANT EASEMENT NOTED IN ITEM 9 INDICATES A FOOTING ENCROACHMENT INTO THE ADJACENT PROPERTY TO THE EAST OF APPROXIMATELY FOUR INCHES (0.33'). IT WAS NOT POSSIBLE TO CONFIRM THIS ENCROACHMENT IN THIS SURVEY.
3. THE ORDINANCE AND AMENDMENTS NOTED IN ITEM 8 CANNOT BE PLOTTED ON THE MAP.

GENERAL STRUCTURAL NOTES

DESIGN STANDARD

1. THIS IS A VOLUNTARY SEISMIC STRENGTHENING OF THE BUILDING. NEW SHEAR WALLS HAVE BEEN ADDED TO SUPPORT THE STRUCTURE IN THE EAST-WEST DIRECTION. NEW WALLS ARE DESIGNED PER THE UBC 1997 AND 1998 OREGON STRUCTURAL SPECIALTY CODE.
   WALLS ARE ATTACHED TO THE EXISTING DIAPHRAGMS WITH NEW DRAG BEAMS. DRAG BEAMS ARE DESIGNED PER CURRENT UBC. EXISTING CLADDING IS FASTENED TO THE BACKING SUPPORTS. THE FOLLOWING ITEMS OF THE EXISTING BUILDING DO NOT APPEAR TO CONFORM TO THE CURRENT CODE:
   A- SEISMIC SEPARATION BETWEEN THIS AND THE ADJACENT STRUCTURE.
   B- DEFORMATION COMPATIBILITY OF THE ELEMENTS.
   C- HELICAL ANCHORS ARE BEING USED (ICBO REPORT DOES NOT EXIST). TEST REPORTED PULL 5.8 KIPS USED
   D- DIAPHRAGM STRAIGHT SHEATHING FOR OVER ROOF STRUCTURE BRACING THE PARAPETS.
   E- EXTERIOR UNBRACED URM INFILL.
   F- EXISTING CONCRETE ELEMENT DETAILING.
2. SUPERIMPOSED DEAD LOADS
   FLOOR PARTITION ALLOWANCE... 20 PSF
3. LATERAL LOADS:
   A. WIND:
      UBC 80 MPH EXPOSURE B
   B. SEISMIC:
      UBC ZONE NO. 3 SEISMIC SOIL TYPE...SD
      R = 5.5 I = 1.0
      Cv = 0.54 Ca = 0.34

GENERAL

1. THESE STRUCTURAL NOTES ARE A SUPPLEMENT TO THE SPECIFICATIONS.
2. SPECIFICATIONS AND CODES REFERENCED IN THESE NOTES ARE THE VERSIONS MOST RECENTLY ADOPTED BY THE PERMITTING AUTHORITY.
3. VERIFY DIMENSIONS AND CONDITIONS WITH THE ARCHITECTURAL DRAWINGS. FIELD VERIFY DIMENSIONS AND ELEVATIONS RELATIVE TO THE EXISTING STRUCTURE PRIOR TO FABRICATION OF MATERIALS.
4. FOR FEATURES OF CONSTRUCTION NOT FULLY SHOWN, PROVIDE THE SAME TYPE AND CHARACTER AS SHOWN FOR SIMILAR CONDITIONS, SUBJECT TO REVIEW BY THE ARCHITECT AND STRUCTURAL ENGINEER OF RECORD.
5. APPLY, PLACE, ERECT OR INSTALL ALL PRODUCTS AND MATERIALS IN ACCORDANCE WITH THE MANUFACTURER'S INSTRUCTIONS.
6. SUBMITTALS.
   A. SUBMIT SHOP DRAWINGS FOR:
      1. REINFORCING STEEL
      2. STRUCTURAL STEEL
   B. SUBMIT SHOP DRAWINGS PRIOR TO FABRICATION OF MATERIAL.

CONCRETE REINFORCING STEEL

1. REINFORCING STEEL (TYPICAL, UNO): ASTM A 615, GRADE 60
2. WELDED REINFORCEMENT: ASTM A 706, GRADE 60
3. WELDED WIRE FABRIC: ASTM A 185, FLAT SHEETS
4. WELDED METAL INSERTS, CONNECTIONS: AWS D1.4
5. REINFORCEMENT MECHANICAL COUPLERS: DEVELOP 125% OF REINFORCEMENT SPECIFIED YIELD STRENGTH.
6. DETAIL, FABRICATE AND PLACE REINFORCING ACCORDING TO ACI 315, "DETAILS AND DETAILING OF CONCRETE REINFORCEMENT".
7. TYPICAL REINFORCING (MINIMUM UNO ON DRAWINGS).
   A. CORNERS AND INTERSECTIONS OF WALLS AND FOUNDATIONS, PRE-CAST PANEL CORNERS: CORNER BARS EQUAL IN SIZE AND NUMBER TO HORIZONTAL REINFORCING. LEG LENGTH: 48 BAR DIAMETER (2'-0" MINIMUM).
   B. WALL AND PRE-CAST PANEL OPENINGS:
      (2) NO. 5 ' OPENING WIDTH, +4'-0" TOP AND BOTTOM
      (2) NO. 5 ' FILL HEIGHT, +4'-0" EACH SIDE
      (2) NO. 5 ' 4'-0" DIAGONAL BARS AT CORNERS
8. DO NOT FIELD BEND, DISPLACE, WELD, HEAT OR CUT REINFORCING UNLESS INDICATED ON THE DRAWINGS, OR APPROVED BY STRUCTURAL ENGINEER OF RECORD.
9. CHAIR WELDED WIRE FABRIC TO PROPER POSITION. LAP ONE (1) FULL MESH PLUS 2" ON SIDES AND ENDS.
10. PLACE ELECTRICAL CONDUIT NEAR CENTER OF SLAB.
11. SPLAY REINFORCING AROUND SLAB OPENINGS WITH 1" IN 10" SPLAY, UNO.
12. MINIMUM COVER FROM CONCRETE SURFACES TO REINFORCING:
    3" + 1/2" TO BOTTOM OF FOOTING
    2" + 1/4" TO EARTH FACE OF WALL
    1" + 1/4" TO INSIDE FACE OF WALL
    2" + 1/4" MAIN STEEL BEAMS AND COLUMNS
    3/4" + SLAB TO TOP AND BOTTOM SURFACES
    CENTER OF SLABS-ON-GRADE
13. REINFORCING LAP SPLICES: CONFORM WITH ACI 318 "BUILDING CODE REQUIREMENTS FOR REINFORCED CONCRETE", AS SHOWN BELOW, UNO ON DRAWINGS.

	3000 PSI		4000 PSI		5000 PSI	
BAR SIZE	TOP BARS	OTHER BARS	TOP BARS	OTHER BARS	TOP BARS	OTHER BARS
#3	21	16	18	16	16	16
#4	28	22	24	19	22	17
#5	35	27	30	23	27	21
#6	46	35	40	31	36	27
#7	63	48	54	42	48	37
#8	82	63	71	55	64	44
#9	104	80	90	64	81	62
#10	132	102	114	88	102	79
#11	162	125	140	108	126	97

LAP SPLICE NOTES:
   A. TOP BARS ARE DEFINED AS HORIZONTAL BARS PLACED SUCH THAT MORE THAN 12" OF CONCRETE IS PLACED BELOW THE BARS.
   B. SPLICE LENGTH BASIS: CLASS B SPLICE, WITH CENTER TO CENTER BAR SPACING OF GREATER THAN 3 BAR DIAMETERS.

CAST-IN-PLACE CONCRETE

1. PROVIDE CONCRETE MATERIALS, FORM WORK, MIXING, PLACING AND CURING ACCORDING TO ACI 301, "STANDARD SPECIFICATION FOR STRUCTURAL CONCRETE".
2. CONCRETE MIX PROPORTIONS:
   A. CONCRETE IS TO ATTAIN A COMPRESSIVE STRENGTH OF 3000PSI.
   B. PROPORTION ACCORDING TO ACI 318, "BUILDING CODE REQUIREMENTS FOR STRUCTURAL CONCRETE".
   C. PROVIDE TARGET SLUMP OF 4 INCHES AT POINT OF PLACEMENT, +/- 1 INCH.
   D. SUBMIT MIX DESIGNS, WITH COMPLETE STATISTICAL BACKUP, FOR REVIEW.
4. SAMPLING AND TESTING OF CONCRETE:
   A. MEASURE COMPRESSIVE STRENGTH ACCORDING TO 28 DAY LABORATORY CURED CYLINDERS.
   B. SAMPLE AND TEST CONCRETE ACCORDING TO APPLICABLE ASTM SPECIFICATIONS.
   C. PROVISIONS OF ACI 318, CHAPTER 5, TO GOVERN ACCEPTANCE OF COMPRESSIVE STRENGTH TEST RESULTS.
   D. TEST A MINIMUM OF 5 CONCRETE TEST CYLINDERS FOR EACH 100 CU. YARDS, OR EACH DAY OF POUR, FOR EACH CONCRETE STRENGTH. TEST (1) CYLINDER AT 7 DAYS AND (2) CYLINDERS AT 28 DAYS.
5. JOINTS:
   A. CONSTRUCTION JOINTS BETWEEN NEW AND EXISTING CONCRETE ARE TO BE ROUGHENED AT THE CONTACT AREA TO A FULL AMPLITUDE OF APPROXIMATELY 1/4", LEAVING THE CONTACT SURFACE CLEAN AND FREE OF LAITANCE.
   B. CONSTRUCTION JOINTS KEYWAYS: PROVIDE WHERE SHOWN ON DRAWINGS.
6. SHORE ALL SELF-SUPPORTING SLABS AND BEAMS UNTIL COMPRESSIVE STRENGTH IS A MINIMUM OF 70% OF ITS DESIGN STRENGTH.
7. CHAMFER EXPOSED CORNERS 3/4", UNO.
8. MASS CONCRETE CONSTRUCTION (SECTIONS THICKER THAN 3'-0"):
   A. MIX DESIGN:
      1. COARSE AGGREGATE: ANGULAR SHAPED, SMOOTH AND UNIFORM GRADING, WITHOUT GAPS.
      2. DO NOT ADD WATER AT THE SITE.

ANCHORS IN CONCRETE AND MASONRY

1. INSTALL ACCORDING TO MANUFACTURER'S RECOMMENDATIONS.
2. INSTALL WITH UBC SPECIAL INSPECTION ACCORDING TO SPECIAL INSPECTION PROGRAM.
3. EXPANSION ANCHORS (CONCRETE):
   A. ICBO-APPROVED; CONFORM WITH FF-S-325, GROUP II, TYPE 4, CLASS 1.
   B. MATERIAL: (ZINC PLATED ACCORDING TO ASTM B 633)
   C. ACCEPTABLE ANCHORS:
      1. "TRUBOLT", BY ITW RAMSET/RED HEAD.
      2. "POWER-STUD", BY POWERS FASTENING INC.
      3. "KWIK-BOLT II", BY HILTI FASTENING SYSTEMS, INC.
4. SLEEVE ANCHORS (GROUTED MASONRY):
   A. CONFORM WITH FF-S-325, GROUP II, TYPE 3, CLASS 3.
   B. MATERIAL: (ZINC PLATED ACCORDING TO ASTM B 633, AISI 304 STAINLESS STEEL)
   C. ACCEPTABLE ANCHORS:
      1. "SLEEVE ANCHOR", BY HILTI FASTENING SYSTEMS, INC.
      2. "DYNABOLT", BY ITW RAMSET/RED HEAD.
      3. "LOK-BOLT", BY POWERS FASTENING.
5. DROP-IN ANCHORS (CONCRETE):
   A. ICBO APPROVED; CONFORM WITH FF-S-325, GROUP VIII, TYPE 1.
   B. MATERIAL: (ZINC PLATED ACCORDING TO ASTM B 633)
   C. ACCEPTABLE ANCHORS:
      1. "HDI", BY HILTI FASTENING SYSTEMS, INC.
      2. "STEEL DROP-IN", BY POWERS FASTENING, INC.
      3. "MULTI-SET II", BY ITW RAMSET/RED HEAD, INC.
6. ADHESIVE ANCHORS (CONCRETE OR GROUTED MASONRY):
   A. ICBO-APPROVED
   B. ANCHOR COMPONENTS: ALL-THREAD ROD, NUT, WASHER AND ADHESIVE INJECTION GEL SYSTEM.
   C. ANCHOR RODS:
      1. RODS WITH ROLLED THREADS.
      2. ANCHOR ROD NUTS: CONFORM WITH ASTM A 194.
      3. ROD MATERIAL:
         A) A-36 MATERIAL, ZINC PLATED ACCORDING TO ASTM B 633.
   D. ACCEPTABLE ADHESIVE INJECTION GEL SYSTEMS:
      1. "HIT HY-150", BY HILTI FASTENING SYSTEMS, INC.
      2. "SET", BY SIMPSON STRONG-TIE COMPANY, INC.
      3. "CIA-GEL 1000", BY COVERT OPERATIONS, INC.
      4. "POWER-FAST", BY POWERS FASTENING COMPANY, INC.
7. ADHESIVE ANCHORS (UNREINFORCED BRICK MASONRY):
   A. ICBO-APPROVED
   B. ANCHOR COMPONENTS: ALL-THREAD ROD, NUT, WASHER, WIRE SCREEN TUBE AND ADHESIVE INJECTION GEL SYSTEM.
   C. ANCHOR RODS:
      1. RODS WITH ROLLED THREADS.
      2. ANCHOR ROD NUTS: CONFORM WITH ASTM A 194.
      3. ROD MATERIAL:
         A) A-36 MATERIAL, HOT-DIPPED GALVANIZED ACCORDING TO ASTM A 153.
   D. ACCEPTABLE ADHESIVE INJECTION GEL SYSTEMS:
      1. "HIT HY-20", BY HILTI FASTENING SYSTEMS, INC.
      2. "ET", BY SIMPSON STRONG-TIE COMPANY, INC.
      3. "CIA-GEL 1000", BY COVERT OPERATIONS, INC.
      4. "POWER-FAST", BY POWERS FASTENING COMPANY, INC.

NON-SHRINK GROUT

1. CONFORM WITH ASTM C 1107 AND C.R.D-621, CORPS OF ENGINEERS "SPECIFICATIONS FOR NON-SHRINK GROUT".
2. SPECIFIED 28 DAY COMPRESSIVE STRENGTH: 5000 PSI.
3. DO NOT PRE-GROUT BASE PLATES.

STRUCTURAL STEEL

1. FABRICATE, ERECT, IDENTIFY AND PAINT STRUCTURAL STEEL ACCORDING TO AISC SPECIFICATIONS.
2. MATERIAL:
   A. WIDE FLANGE SHAPES: ASTM A 992, OR ASTM A 572, GRADE 50, CONFORMING WITH AISC TECHNICAL BULLETIN 3.
   B. ANGLES, TEES, CHANNELS AND PLATE: ASTM A 36.
   C. STRUCTURAL TUBES: ASTM A 500, GRADE B, FY = 46 KSI.
   D. STRUCTURAL PIPE: ASTM A 53, GRADE B, TYPE E OR TYPE S, FY = 35 KSI.
   E. HEADED STUDS AND SHEAR CONNECTORS: COLD-DRAWN BAR STOCK CONFORMING WITH ASTM A 108, GRADES 1010 THROUGH 1018 INCLUSIVE.
3. CONNECT ALL MEMBERS WITH SEMI-FINISHED MACHINE BOLTS, ASTM A 307, GRADE A, UNO ON DRAWINGS.
4. GALVANIZED BOLTS (WHERE SHOWN ON DRAWINGS): HOT-DIPPED GALVANIZED ACCORDING TO ASTM A 153, CLASS C.
5. ANCHOR BOLTS:
   A. ASTM A 307, GRADE A
   B. PROVIDE WITH STANDARD WASHERS AND NUTS.
   C. GALVANIZE BOLTS (WHERE NOTED ON DRAWINGS) ACCORDING TO ASTM A 153, CLASS C. OVER-TAP NUTS TO CLASS 2A FIT BEFORE GALVANIZING, ACCORDING TO ASTM A 563.
6. PROVIDE BEVELED WASHERS AT BOLT HEADS OR NUTS BEARING ON SLOPING SURFACES.
7. WELDING:
   A. CONFORM WITH AWS SPECIFICATIONS.
   B. WELDERS TO BE QUALIFIED UNDER AWS SPECIFICATIONS.
   C. WELDS MATERIAL: 70 KSI FILLER METAL, UNO. PROVIDE LOW-HYDROGEN FILLER METALS AT MOMENT FRAME WELDS.
   D. WELDS TO METAL DECK, METAL STUDS OR OTHER LIGHT GAUGE METALS: CONFORM TO AWS D1.3.
   E. WELDING OF REINFORCING STEEL: AS NOTED IN "CONCRETE REINFORCING STEEL" PORTION OF STRUCTURAL NOTES.
   F. WELDS TO GALVANIZED STEEL AND AREAS DAMAGED BY WELDING, FLAME CUTTING OR HANDLING: CLEAN, DRY AND REMOVE OIL, GREASE, SALT AND CORROSIVE PRODUCTS. APPLY ORGANIC COLD GALVANIZING COMPOUND WITH A MINIMUM OF 94% ZINC DUST IN THE DRY FILM. APPLY IN MULTIPLE COATS TO ACHIEVE AN 8 MIL THICKNESS.
8. CONTRACTOR TO DESIGN AND PROVIDE ERECTION AIDS (BOLTS, CLIPS, SHIMS, SEAT), ETC/ REQUIRED TO FACILITATE CONSTRUCTION.
9. INSTALL AND INSPECT HEADED STUDS AND SHEAR CONNECTORS ACCORDING TO CHAPTER 7 OF AWS D1.1 "STRUCTURAL WELDING CODE-STEEL".
10. EMBEDDED STEEL ASSEMBLIES: HOT-DIP GALVANIZE ACCORDING TO ASTM A 123, WHERE NOTED ON DRAWINGS.

LIGHT GAUGE STEEL FRAMING

1. CONFORM WITH UBC STANDARD 27-1 AND AISI "SPECIFICATION FOR THE DESIGN OF COLD-FORMED STEEL STRUCTURAL MEMBERS" FOR FABRICATION, ERECTION AND IDENTIFICATION OF LIGHT GAUGE STEEL FRAMING.
2. MATERIAL:
   A. 12, 14 AND 16 GAUGE MEMBERS: ASTM A 446 GRADE D (FY = 50 KSI)
   B. 18 GAUGE AND LIGHTER MEMBERS: ASTM A 446 GRADE A (FY = 33 KSI)
   C. 18 GAUGE OR 20 GAUGE MEMBERS AT SHEAR WALLS: ASTM A 653 SQ, GRADE A (FY = 33 KSI)
3. MEMBERS, TYPES AS DESIGNATED BY THE METAL STUD MANUFACTURER'S ASSOCIATION (MSMA). SEE DRAWINGS FOR SIZES.
   A. TYPICAL STUDS: 1C
   B. SHEAR WALL STUDS: 2C
   C. STUD WALL TRACKS: 1U
   D. JOISTS: 1J (I"-PUNCHED)
4. MEMBER CONNECTIONS:
   CONNECT MEMBERS WITH SELF-DRILLING SCREWS.
5. PROVIDE ALL ACCESSORIES INCLUDING, BUT NOT LIMITED TO, TRACKS, CLIPS, WEB STIFFENERS, ANCHORS, FASTENING DEVICES AND OTHER ACCESSORIES REQUIRED FOR A COMPLETE INSTALLATION.
6. PROVIDE END BLOCKING WHERE JOIST ENDS ARE NOT OTHERWISE RESTRAINED FROM ROTATION.
7. LOCATE JOISTS DIRECTLY OVER BEARING STUDS, UNO.
8. DO NOT SPLICE AXIALLY LOADED STUDS.
9. ATTACH EACH FLANGE OF STUDS TO FLANGES OF BOTH UPPER AND LOWER TRACKS.
10. FIT METAL STUDS TIGHTLY INTO TOP AND BOTTOM TRACKS AT BEARING WALL CONSTRUCTION. END GAPS ARE NOT ALLOWED.

SPECIAL INSPECTION PROGRAM FOOTNOTES:

1. PROVIDE SPECIAL INSPECTION, SPECIAL TESTING, REPORTING AND COMPLIANCE PROCEDURES ACCORDING TO CHAPTER 17 OF THE UBC OREGON STATE SPECIALTY CODE.
2. SPECIAL INSPECTOR QUALIFICATIONS: DEMONSTRATE COMPETENCE, TO THE SATISFACTION OF THE BUILDING OFFICIAL, FOR INSPECTION OF THE PARTICULAR TYPE OF CONSTRUCTION OR OPERATION IN QUESTION.
3. PRIOR TO THE BEGINNING OF CONSTRUCTION, REVIEW THE SPECIAL INSPECTION REQUIREMENTS WITH THE ARCHITECT, ENGINEER, BUILDING OFFICIAL, CONTRACTOR AND SPECIAL INSPECTORS.
4. DUTIES OF THE SPECIAL INSPECTOR INCLUDE, BUT ARE NOT LIMITED TO:
   A. OBSERVE THE WORK FOR CONFORMANCE WITH THE APPROVED PERMIT DRAWINGS AND SPECIFICATIONS. BRING DISCREPANCIES TO THE IMMEDIATE ATTENTION OF THE CONTRACTOR FOR CORRECTION, THEN, IF UNCORRECTED, TO THE ENGINEER AND TO THE BUILDING OFFICIAL.
   B. FURNISH INSPECTION REPORTS FOR EACH INSPECTION TO THE BUILDING OFFICIAL, ARCHITECT, ENGINEER, AND CONTRACTOR IN A TIMELY MANNER.
   C. SUBMIT A FINAL REPORT STATING WHETHER THE WORK REQUIRING SPECIAL INSPECTION WAS INSPECTED, AND WHETHER THE WORK IS IN CONFORMANCE WITH THE APPROVED PERMIT DRAWINGS AND SPECIFICATIONS.
5. DUTIES OF THE CONTRACTOR INCLUDE, BUT ARE NOT LIMITED TO:
   A. NOTIFY SPECIAL INSPECTOR THAT WORK IS READY FOR INSPECTION AT LEAST 24 HOURS BEFORE INSPECTION IS REQUIRED.
   B. MAINTAIN ACCESS TO WORK REQUIRING SPECIAL INSPECTION UNTIL IT HAS BEEN OBSERVED AND INDICATED TO BE IN CONFORMANCE BY THE SPECIAL INSPECTOR AND APPROVED BY THE BUILDING OFFICIAL.
   C. PROVIDE THE SPECIAL INSPECTOR WITH ACCESS TO APPROVED PERMIT DRAWINGS AND SPECIFICATIONS AT THE JOB SITE.
   D. MAINTAIN JOB-SITE COPIES OF ALL REPORTS SUBMITTED BY THE SPECIAL INSPECTOR.
6. DEFINITIONS:
   A. CONTINUOUS INSPECTION: THE SPECIAL INSPECTOR IS OBSERVING THE WORK REQUIRING SPECIAL INSPECTION AT ALL TIMES.
   B. PERIODIC INSPECTION: THE SPECIAL INSPECTOR IS ON SITE AS REQUIRED TO CONFIRM THAT THE WORK REQUIRING SPECIAL INSPECTION IS IN CONFORMANCE.

SPECIAL TESTING REQUIREMENTS

1. STRUCTURAL CONCRETE:
   SAMPLE AND TEST ACCORDING TO STRUCTURAL NOTES.
2. ADHESIVE ANCHORS IN UNREINFORCED MASONRY:
   A. TEST ACCORDING TO REQUIREMENTS OF UBC REPORT.
   B. MINIMUM INFORMATION IN REPORT: TEST LOCATIONS, BRICK/MORTAR CONDITION, BOLT MOVEMENT/ELONGATION, EMBEDMENT DEPTH, AND APPLIED LOAD.

SYMBOLS

PLAN SYMBOLS

SLAB DEPRESSIONS
- BOUNDARY OF DEPRESSION OR STEP IN SLAB

BEAM DESIGNATIONS
- W16X31CAMB — AMOUNT OF BEAM CAMBER IN INCHES
- W16X31 (-2") — ADDITIONAL INCREASE OR DECREASE IN TOP OF STEEL ELEVATION
- W16X31* — STEEL MEMBER TO BE ASTM A36 STEEL, SEE SPECS.

BEAM-COLUMN MOMENT CONNECTIONS
- MOMENT RESISTING BEAM-COLUMN CONNECTION.

SHEAR CONNECTIONS
- SHEAR CONNECTION

COLUMNS
- WIDE-FLANGE COLUMN
- TUBE COLUMN

SLAB OPENINGS
- OPENING IN SLAB SEE TYP. DETAILS

BRACED FRAME
- INDICATES BRACED FRAME, SEE ELEVATIONS

DIAGONAL BRACE
- DIAGONAL "BOOMER" BRACE OR PARAPET BRACE ABOVE OR BELOW BEAM

SHORE

MATERIAL SYMBOLS

- UNDISTURBED EARTH SHOWN IN SECTION
- COMPACTED EARTH SHOWN IN SECTION
- ROCK FILL, GRAVEL SHOWN IN SECTION
- SAND, GROUT, EPOXY SHOWN IN SECTION
- CONCRETE (NEW) PLAN OR SECTION
- PRECAST CONCRETE PLAN OR SECTION
- BRICK OR CONC. MASONRY PLAN OR SECTION
- STEEL : AS NOTED PLAN OR SECTION
- STEEL : ROLLED SHAPES PLAN OR SECTION
- SHEET METAL : AS NOTED PLAN OR SECTION
- PLYWOOD SHEATHING SHOWN IN SECTION

REFERENCE SYMBOLS

DETAIL/SECTION
- SECTION NUMBER DRAWING WHERE FOUND, HYPHEN INDICATES SAME SHEET
- LINE OF SECTION CUT
- DIRECTION OF VIEW

DETAIL
- DETAIL NUMBER DRAWING WHERE FOUND, HYPHEN INDICATES SAME SHEET
- LINE OF SECTION CUT
- DIRECTION OF VIEW
- AREA OF DETAIL

DETAIL PLAN OR ELEVATION
- AREA OF ENLARGED PLAN OR ENLARGED ELEVATION

SINGLE ELEVATION
- DIRECTION OF VIEW
- ELEVATION NUMBER
- DRAWING WHERE ELEVATION IS FOUND, HYPHEN INDICATES SAME SHEET

GRID LINES

LEVEL LINE
- SECOND FLOOR EL. 123'-0"
- INDICATES HEIGHT ABOVE DATUM

DIMENSION POINT
- INDICATES POINT ON DIMENSION STRING TO WHICH A POINT ON RELATED DRAWING IS ALSO DIMENSIONED

WORK POINT
- WORK POINT OF CONNECTION; POINT WHERE CENTROID OF MEMBERS INTERSECT

REVISION
- REVISION NUMBER - SEE REVISION HISTORY ON TITLE BLOCK OF EACH DWG.

MATCH LINE
- MATCH LINE SEE SHT. S2.1.0
- DRAWING WHERE CONTINUATION IS FOUND
- DRAWING SIDE

KEY NOTE
- SEE LIST OF NOTES ON EACH DWG

CENTER POINT OF CURVE
- CURVE TO BE LOCATED
- RADIUS OF CURVE
- CENTER POINT OF CURVE

REFERENCED ELEVATION
- TOP OF EL. 49'-0" — DESCRIPTION OF REFERENCED POINT
- ELEVATION OF POINT IN FEET ABOVE DATUM

DRAWING INDEX

APPEALS

APPEAL # B-4.2: WALL BETWEEN MAIN LOBBY 201 AND TENANT SPACE (RECEPTION 202) BE A NON RATED WALL, BUT THE DOORS HAVE AUTOMATIC CLOSERS AND SMOKE SEALS. (GRANTED AS PROPOSED 9-5-01)

APPEAL # B-4.3: NO BARRIER IN EXIT ENCLOSURE "STAIR 2".(GRANTED AS PROPOSED 9-5-01)

APPEAL # B-4.4: NEW STAIR PLACED INTO OPENING BETWEEN LOWER AND FIRST LEVEL. (GRANTED 9-5-01 PROVIDED THE BASEMENT SPRINKLER SYSTEM IS MAINTAINED PER THE FIRE MARSHAL'S OFFICE AND THE BUILDING IS PROVIDED WITH A SMOKE DETECTION SYSTEM PER THE FIRE MARSHAL'S OFFICE.)

GENERAL NOTES

1. TYPICAL DIMENSIONS ARE SHOWN AS FOLLOWS UNLESS OTHERWISE NOTED:
   A. EXTERIOR WALLS ARE DIMENSIONED TO FACE OF BRICK, FACE OF CONCRETE OR FACE OF FRAMING.
   B. INTERIOR WALLS ARE DIMENSIONED TO CENTERLINE OF FRAMING OR FACE OF BRICK OR CONCRETE.
   C. ADJUST WALLS AS REQUIRED TO ALIGN FINISHES AT LOCATIONS WHERE WALL TYPES VARY.
   D. ADJUST WALLS AS REQUIRED TO ALIGN FINISHES AT LOCATIONS WERE AN EXISTING WALL IS EXTENDED WITH A NEW WALL.
2. PROVIDE AIRTIGHT CONSTRUCTION AND FIRE RATED GYPSUM WALL BOARD @ ALL FIRE RATED PARTITIONS.
3. ALL PARTITIONS IN ROOMS NOTED ON REFLE - CEILING PLANS AND FINISH SCHEDULE AS "OPEN TO STRUCTURE" ...VE FINISHES EXTENDED TO STRUCTURE ABOVE.
4. IF NOT NOTED WALL TYPE IS A
5. ALL FLOOR DRAINS TO BE LOCATED AT LOWEST FLOOR ELEVATION.

KEYED SHEET NOTES

1. REFINISH ALL INTERIOR WINDOWS
2. NEW PLAST LAM. CABINETS
3. EXISTING APPLIANCE – FURNISH HOOK UP
4. INSTALL 1/2" FABRIC WRAPPED TACK PANEL FULL HEIGHT OF WALL
5. ROUGH IN PLUMBING ONLY

RATED PARTITION
RE: A1C.1

GENERAL NOTES

1. TYPICAL DIMENSIONS ARE SHOWN AS FOLLOWS UNLESS OTHERWISE NOTED:
   A. EXTERIOR WALLS ARE DIMENSIONED TO FACE OF BRICK, FACE OF CONCRETE OR FACE OF FRAMING.
   B. INTERIOR WALLS ARE DIMENSIONED TO CENTERLINE OF FRAMING OR FACE OF BRICK OR CONCRETE, U.O.N.
   C. ADJUST WALLS AS REQUIRED TO ALIGN FINISHES AT LOCATIONS WHERE WALL TYPES VARY.
   D. ADJUST WALLS AS REQUIRED TO ALIGN FINISHES AT LOCATIONS WERE AN EXISTING WALL IS EXTENDED WITH A NEW WALL.
2. PROVIDE AIRTIGHT CONSTRUCTION AND FIRE RATED GYPSUM WALL BOARD @ ALL FIRE RATED PARTITIONS.
3. ALL PARTITIONS IN ROOMS NOTED ON REFLECTED CEILING PLANS AND FINISH SCHEDULE AS "OPEN TO STRUCTURE" HAVE FINISHES EXTENDED TO STRUCTURE ABOVE.
4. IF NOT NOTED WALL TYPE IS (B)
5. ALL FLOOR DRAINS TO BE LOCATED AT LOWEST FLOOR ELEVATION.
6. STRIP PAINT OF ALL EXTERIOR WINDOWS. REBUILT WINDOW. REPAINT OUTSIDE FACE. SEAL INSIDE FACE. MAKE ONE WINDOW PER BAY OPERABLE. COORDINATE LOCATION OF OPERABLE WINDOW WITH ARCHITECT.

LIGHTING FIXTURE SCHEDULE

TYPE	DESCRIPTION, BRAND & CATALOG NUMBER	LAMPS REQUIRED
A	SURFACE MOUNTED, 2-LAMP, 4-FOOT, FLUORESCENT DIRECT/INDIRECT INDUSTRIAL FIXTURE, WHITE METAL PERFORATED REFLECTOR AND PERFORATED REFRACTOR, MOUNTED ON FOUR FOOT SECTION OF TRUNKING SYSTEM, MATTE WHITE FINISH, WITH ONE, TWO LAMP, ELECTRONIC T8, HIGH OUTPUT, 277 VOLT BALLAST, AND TWO, 32 WATT, OCTRON T8, 3000 KELVIN, 85 CRI, ECOLOGICAL LAMPS. (78) INPUT WATTS PER FIXTURE (.65) AMPS AT 120 VOLTS ZUMTOBEL # ZX-RC-AP-N2/32-OSISP-4'-120V	2 - F032/830/XP/ECO
AE	SAME AS TYPE 'A' EXCEPT EQUIPPED WITH FACTORY INSTALLED 1400 LUMEN EMERGENCY BATTERY PACK OPTION FOR 90 MINUTE EMERGENCY EGRESS LIGHTING. (78) INPUT WATTS PER FIXTURE (.65) AMPS AT 120 VOLTS ZUMTOBEL # ZX-RC-AP-N2/32-OSISP-4'-120V-EL14	2 - F032/830/XP/ECO
B4	PENDANT MOUNTED, 2-LAMP, 4-FOOT, FLUORESCENT DIRECT/INDIRECT LINEAR FIXTURE, WHITE PERFORATED REFRACTOR PANEL WITH OPAL INLAY BASKET, MATTE WHITE FINISH, MOUNTED ON FOUR FOOT SECTION OF TRUNKING SYSTEM, SUSPENDED WITH 48" ADJUSTABLE AIRCRAFT CABLE WITH ONE, TWO LAMP, ELECTRONIC T8, HIGH OUTPUT 120 VOLT BALLAST, AND TWO, 32 WATT, OCTRON T8, 3000 KELVIN, 85 CRI ECOLOGICAL LAMPS. (78) INPUT WATTS PER FIXTURE (.65) AMPS AT 120 VOLTS ZUMTOBEL # ZX-RC-WOR-N2/32-OSISP-4'-120V-C48"	2 - F032/830/XP/ECO
B8	PENDANT MOUNTED, 4-LAMP, 8-FOOT, FLUORESCENT DIRECT/INDIRECT LINEAR FIXTURE, WHITE PERFORATED REFRACTOR PANEL WITH OPAL INLAY BASKET, MATTE WHITE FINISH, MOUNTED ON TWELVE FOOT SECTION OF TRUNKING SYSTEM, SUSPENDED WITH 48" ADJUSTABLE AIRCRAFT CABLE WITH TWO, TWO LAMP, ELECTRONIC T8, HIGH OUTPUT 120 VOLT BALLAST, AND FOUR, 32 WATT, OCTRON T8, 3000 KELVIN, 85 CRI ECOLOGICAL LAMPS. (156) INPUT WATTS PER FIXTURE (1.31) AMPS AT 120 VOLTS ZUMTOBEL # (2)ZX-RC-WOR-N2/32-OSISP-8'-120V-C48"	4 - F032/830/XP/ECO
B8E	SAME AS TYPE 'B8' EXCEPT EQUIPPED WITH FACTORY INSTALLED 1400 LUMEN EMERGENCY BATTERY PACK OPTION FOR 90 MINUTE EMERGENCY EGRESS LIGHTING. (156) INPUT WATTS PER FIXTURE (1.31) AMPS AT 120 VOLTS ZUMTOBEL #(2)ZX-RC-WOR-N2/32-OSISP-8'-120V-C48"-EL14	4 - F032/830/XP/ECO
CE	PENDANT MOUNTED, 2-LAMP, 42 WATT, DIRECT, 1-LAMP, 42 WATT, INDIRECT, COMPACT FLUORESCENT LOWBAY FIXTURE, 13" DIAMETER, MATTE WHITE HOUSING, 120 VOLT ELECTRONIC BALLASTS, ASPECT SERIES EMERGENCY CANOPY FOR 90 MINUTE EMERGENCY EGRESS OPERATION, AND TRIPLE TUBE, 2700 KELVIN, 82 CRI LAMPS. (123) INPUT WATTS PER FIXTURE (1.03) AMPS AT 120 VOLTS DELRAY # 7702-2/42-1/42-120V-EM	3 - CF42DT/E/IN/827
D	RECESSED, 1-HORIZONTAL LAMP, 26 WATT, COMPACT FLUORESCENT DOWNLIGHT FIXTURE, 6" APERATURE, MATTE PEWTER ALZAK REFLECTOR, 120 VOLT ELECTRONIC BALLAST AND TRIPLE TUBE, 2700 KELVIN, 82 CRI LAMP. (25) INPUT WATTS PER FIXTURE (.21) AMPS AT 120 VOLTS ZUMTOBEL # 5SD6113-120V-6113R-MP	1 - CF26DT/E/IN/827
DE	SAME AS TYPE 'D' EXCEPT EQUIPPED WITH EMERGENCY BATTERY PACK OPTION FOR 90 MINUTE EMERGENCY EGRESS OPERATION. (25) INPUT WATTS PER FIXTURE (.21) AMPS AT 120 VOLTS ZUMTOBEL # 5SD6113-120V-6113R-MP-E1	1 - CF26DT/E/IN/827
E	SURFACE, UNIVERSAL MOUNT, LED EMERGENCY EXIT SIGN FIXTURE, WHITE POLYCARBONATE HOUSING, 120 VOLT OPERATION WITH RED LEDS AND ARROWS AS REQUIRED. (.74) INPUT WATTS PER FIXTURE (.04) AMPS AT 120 VOLTS LITHONIA # LQMSW-3R-120V-EL-N	RED LEDS
F8-N	PENDANT MOUNTED, 2-LAMP, 8-FOOT FLUORESCENT DIRECT/INDIRECT FIXTURE, MATTE WHITE HOUSING, PERFORATED METAL REFLECTOR, MATTE SILVER ALUMINUM PARABOLIC LOUVER, WITH ONE, TWO LAMP, ELECTRONIC T8, 120 VOLT BALLAST, AND TWO, 32 WATT, OCTRON T8, 3000 KELVIN, 85 CRI LAMPS. (114) INPUT WATTS PER FIXTURE (.96) AMPS AT 120 VOLTS ZUMTOBEL # ID-VM-2/32-8'-i-120V-30-SVP	2 - F032/830/XP/ECO
F8-R	SAME AS TYPE 'F8-N' EXCEPT EXISTING FIXTURE TO BE RE-LOCATED AN RE-USED.	
F12-R	SAME AS TYPE 'F8-R' EXCEPT 12-FOOT FIXTURE	
G	SURFACE, 1-LAMP, 40 WATT, BIAX FLUORESCENT WALL MOUNTED VANITY LIGHT FIXTURE, WHITE OPAL ACRYLIC DOUBLE DIFFUSE LENS, BRUSHED ALUMINUM FINISH, 120 VOLT ELECTRONIC BALLAST AND BIAX T5, 2700 KELVIN, 82 CRI LAMP. (39) INPUT WATTS PER FIXTURE (.33) AMPS AT 120 VOLTS VISA # CB6112-1F40-BA-120V	1 - FT40DL/827/RS
H	RECESSED, 1-LAMP, 42 WATT, COMPACT FLUORESCENT WALLWASHER FIXTURE, MATTE WHITE HOUSING, NON-ACCESSIBLE CEILING MOUNTED, EXTRUDED ALUMINUM ANODIZED REFLECTOR, 120 VOLT ELECTRONIC BALLAST, AND TRIPLE TUBE, 2700 KELVIN, 82 CRI LAMP. (41) INPUT WATTS PER FIXTURE (.35) AMPS AT 120 VOLTS ELLIPTIPAR # F211-H142-T-02-120V-00	1 - CF42DT/E/IN/827
J4	SURFACE, 2-LAMP, 4-FOOT, FLUORESCENT OPEN STRIP FIXTURE, 4-3/4' WIDE BAKED WHITE ENAMEL CHANNEL, WITH ONE, TWO LAMP, ELECTRONIC T8, 120 VOLT BALLAST, AND TWO, 32 WATT, OCTRON T8, 3000 KELVIN, 85 CRI, ECOLOGICAL LAMPS. (62) INPUT WATTS PER FIXTURE (.52) AMPS AT 120 VOLTS LITHONIA # C232-120V-GEB	2 - F032/830/XP/ECO
J8	SURFACE, 4-LAMP, 8-FOOT, FLUORESCENT OPEN STRIP FIXTURE, 4-3/4' WIDE BAKED WHITE ENAMEL CHANNEL, WITH ONE, FOUR LAMP, ELECTRONIC T8, 120 VOLT BALLAST, AND FOUR, 32 WATT, OCTRON T8, 3000 KELVIN, 85 CRI, ECOLOGICAL LAMPS. (114) INPUT WATTS PER FIXTURE (.96) AMPS AT 120 VOLTS LITHONIA # TC232-1/4-120V-GEB	4 - F032/830/XP/ECO
K	SAME AS TYPE 'J4' EXCEPT EQUIPPED WITH WIREGUARD OPTION FOR USE AS ELEVATOR PIT LIGHT. (62) INPUT WATTS PER FIXTURE (.52) AMPS AT 120 VOLTS LITHONIA # C232-120V-GEB-WGCUN	2 - F032/830/XP/ECO
L	SURFACE MOUNTED, SINGLE CIRCUIT LOW VOLTAGE LIGHT TRACK SYSTEM, ALUMINUM FINISH, LENGTHS AS SHOWN ON DRAWINGS COMPLETE WITH TRANSFORMERS, AND MOUNTING HARDWARE, 120 VOLT PRIMARY OPERATION AND 12 VOLT SECONDARY OPERATION. (55) INPUT WATTS PER FIXTURE (.46) AMPS AT 120 VOLTS BRUCK 'VIA' SERIES AS REQUIRED	NONE REQUIRED
M	TRACK MOUNTED, 50 WATT, MR16, LOW VOLTAGE ADUSTABLE ACCENT LIGHT FIXTURE, MATTE CHROME FINISH, 12 VOLT SECONDARY OPERATION, WITH SYLVANIA TITAN 'XP' SERIES, 6000 HOUR LAMPS, BEAM SPREADS AS DETERMINED BY ARCHITECT. (55) INPUT WATTS PER FIXTURE (.46) AMPS AT 120 VOLTS BRUCK 'SILENA' SERIES # 220470MC FIXTURES	1 - 50MR16/XP/XXXX

F-1,2,3,5,6 CARRIER #58MXA060-16 NATURAL GAS-FIRED FURNACE.
1,600 CFM @.05" SP. 1/2HP SUPPLY FAN MOTOR
NATURAL GAS INPUT=80,000 BTUH OUTPUT=75,000 BTUH
VOLTAGE: 120V, 1Ø, 60CPS FLA=7.9 AMPS
UNIT WEIGHT: 175 LBS.
ACCESSORIES: CONCENTRIC VENT KIT, HONEYWELL #T-7300 PROGRAMMABLE THERMOSTAT, CKAXA048 D.X. COOLING COILS.

F-4 CARRIER #58MXA060-12 NATURAL GAS-FIRED FURNACE.
1,200 CFM @.05" SP. 1/3HP SUPPLY FAN MOTOR
NATURAL GAS INPUT=60,000 BTUH OUTPUT=56,000 BTUH
VOLTAGE: 120V, 1Ø, 60CPS FLA=5.8 AMPS
UNIT WEIGHT: 163 LBS.
ACCESSORIES: CONCENTRIC VENT KIT, HONEYWELL #T-7300 PROGRAMMABLE THERMOSTAT, CKSAXA036 D.X. COOLING COILS.

F-7 CARRIER #58MXA060-12 NATURAL GAS-FIRED FURNACE.
1,200 CFM @ .05" SP. 1/3HP SUPPLY FAN MOTOR
NATURAL GAS INPUT=60,000 BTUH OUTPUT=56,000 BTUH
VOLTAGE: 120V, 1Ø, 60CPS FLA=5.8 AMPS
UNIT WEIGHT: 163 LBS.
ACCESSORIES: CONCENTRIC VENT KIT, HONEYWELL #T-7300 PROGRAMMABLE THERMOSTAT, CKSAXA036 D.X. COOLING COILS.

FC-1 CARRIER #FB4ANF060 HEATPUMP FAN COIL.
2,000 CFM @.05" SP. 3/4HP SUPPLY FAN MOTOR
10KW ELECTRIC HEATER MCA=58.5 AMPS
UNIT WEIGHT: 176 LBS.
ACCESSORIES: SECONDARY CONDENSATE DRAIN PAN,
HONEYWELL #T-7300 PROGRAMMABLE THERMOSTAT.

FC-2,3 CARRIER #FB4ANF018 HEATPUMP FAN COIL.
600 CFM @.05" SP. 1/5HP SUPPLY FAN MOTOR
5KW ELECTRIC HEATER MCA=28.4 AMPS
ACCESSORIES: SECONDARY CONDENSATE DRAIN PAN,
HONEYWELL #T-7300 PROGRAMMABLE THERMOSTAT.

CU-1,2,3,5 CARRIER #38TKB048 4-TON AIR COOLED CONDENSING UNIT.
48,000 BTUH @ARI CONDITIONS.
VOLTAGE: 240V-1Ø-60CY MCA=31.0 AMPS
ACCESSORIES: KSAHS1501AAA START ASSIST, REFRIGERANT LINE SET.

CU-4 CARRIER #38TKB030 2-1/2 TON AIR COOLED CONDENSING UNIT.
30,000 BTUH @ARI CONDITIONS.
VOLTAGE: 240V-1Ø-60CY MCA=17.9 AMPS
UNIT WEIGHT: 138 LBS.
ACCESSORIES: KSAHAS1001AAA START ASSIST, REFRIGERANT LINE SET.

CU-7 CARRIER #38TKB036 3-TON AIR COOLED CONDENSING UNIT.
36,000 BTUH @ARI CONDITIONS. MCA=19.9 AMPS
VOLTAGE: 240V-1Ø-60CY
UNIT WEIGHT: 159 LBS.
ACCESSORIES: KSAHS1001AAA START ASSIST, REFRIGERANT LINE SET.

HP-1 CARRIER #38YKC048 4-TON HEAT PUMP CONDENSING UNIT.
48,000 BTUH @ARI CONDITIONS.
VOLTAGE: 240V-1Ø-60CY MCA=37.3 AMPS
UNIT WEIGHT: 265 LBS.
ACCESSORIES: KSAHS1601AAA START ASSIST, REFRIGERANT LINE SET.

HP-2,3 CARRIER 33SYKC018 1-1/2 TON HEAT PUMP CONDENSING UNIT.
18,000 BTUH @ARI CONDITIONS.
VOLTAGE: 240V-1Ø-60CY MCA=13.5 AMPS
ACCESSORIES: KSAHS1001AAA START ASSIST, REFRIGERANT LINE SET.

EF1,2,4,5,6 BROAN #L-200 LO-SONE CEILING EXHAUSE FANS.
200 CFM @.01" SP.
VOLTAGE: 120V-1Ø-60CY FLA=1.8 AMPS

EF-3 BROAN #L-300 LO-SONE CEILING EXHAUST FAN.
300 CFM @.01" SP.
VOLTAGE: 120V-1Ø-60CY FLA=2.6 AMPS

RH-1 LOREN COOK, #FR-24 ELEVATOR RELIEF HOOD
ACCESSORIES: RCG24-9.5H ROOF CURB, BIRDSCREEN
UNIT WEIGHT: 170 LBS.

SUMP-1 SUMP PUMP (ELEVATOR).

Royal Steen
AG825

SILENT KNIGHT
5820XL Calculations

Project Name: OAK STREET BUILDING
Prepared By: Bob Beard
Date: 7/30/2001

Standby Hours: 24
Alarm Mins: 5
Derating Factor: 1.2
Voltage Drop Warning Threshold %: 10

Panel ID: 5820XL
Location: Lower level Telco Rm.
Model: 5820XL Addressable Fire Alarm Control
Volts: 24 VDC
Max NAC Current: 3.0 Amps
Max Panel Current: 5.0 Amps

PROJECT INFORMATION

Street Address:	733 SW OAK ST
Description of Work:	TI FOR NEW TENANT LOCATED ON 2ND FLOOR

The following assumptions were made when reviewing your project:

Occupancy group	Construction Type	Square Footage	Stories	Sprinklers	Alarms	Detection
B	V-1HR	6490	2	No	No	No

PLAN REVIEW

Based on the plans submitted, the following items appear to be missing or not in conformance with: ☐ Oregon Structural Specialty Code and/or other city, state, or federal requirements:

Item #	Location on plans	Code Section	Clarification / Correction Required
1			The drawings have been reduced but the scale has not been changed. Indicate the correct scale on the drawings.
2	A2A.3	1109.9	Indicate door sizes and note that lever handles will be installed.
3	A2A.3	1003.3.1.5 1003.3.1.1	The occupant load of the multi-purpose room is over 50, therefore all the doors are to swing in the direction of egress from this room. Plans currently show doors 315A and 315B swinging into the room.
4	A2A.3	1007.2.5	Doors serving as means of egress from an assembly room having an occupant load of over 50 are to be equipped with panic hardware. Indicate that doors 310 and 317B will be equipped with panic hardware. Also indicate that door 315A will be equipped with panic hardware since this would be the required means of egress door when the westerly portion of the multi-purpose room is closed off from the other two portions.

5	L1	1003.2.8	Indicate the location of required exit signs.
6		1003.2.9 City Egress Lighting Program Guide	The computed occupant load for this floor is over 100; therefore egress lighting with battery or generator backup is required. With each set of drawings provide an egress path plan showing which portions of the floor will receive at least the code required minimum amount of illumination from battery or generator powered light fixtures when power to the normal lighting system is interrupted. Show the exit sign locations also on this plan.
7	K1A7A.1	1109.10	Indicate the dimensions for the fixtures and grab bars in the restrooms.
8	A7A 3	2406	Indicate safety glazing in glazed doors and in relites that are within 2 feet doors or relites that extend to within 18 inches of the floor.
9			A separate heating and ventilating permit is required for the HVAC system serving this floor. Make application for this permit prior to the issuance of the building permit.

To respond to this checksheet, come to Document Services (the second floor of 1900 SW Fourth Ave., between 7:30 a.m. and 3:00 p.m.) and update all four sets of the originally submitted drawings. To update the drawings, you may either replace the original sheets with new sheets, or edit the originally submitted sheets. (Specific instructions for updating plans are posted in Document Services.)

Please complete the attached Checksheet Response Form and include it with your re-submittal.

If you have specific questions concerning this Checksheet, please call me at 503-823-7534. To check the status of your project, please call 503 823-7000 and select option 4. Your Plan Review Status will be faxed to you, so please be ready to provide a fax number. If you don't have a fax number you may dial 503 823-7357 to request a Plan Review Status or visit Document Services.

You may receive separate Checksheets from other City agencies that will require separate responses.

Life Safety Checksheet Response

Permit #: 02-126858-000-00-CO **Date:** _____

Customer name and phone number: _____

Note: In the spaces below, please provide specific information concerning the changes that you have made in response to the checksheet. Note the checksheet item number, your response or a description of the revision, and the location of the change on the plans (i.e. page number and/or detail number). Use as many lines as needed. *If the item is not in response to a checksheet, write "Applicant" in the column labeled "Checksheet item number."*

Checksheet item number	Description of changes, corrections, additions, etc.	Location on plans
1	All drawings @ 1/8" = 1'	
2	Lever handles specified	Door Sched + Cut Sheets
3	Doors 315 A + B - changed swing direction	A2A.3
4	Doors 310, 317B, 315A supplied w/ panic hardware	Door Schedule
5	Exit signs located	A2A.3 + L1
6	Egress Lighting Study sheet	
7	Dimensions for fixtures + grab bars	A7A.3
8	Tempered glass shown	A7A.3
9	Previous Permit attained	N3, M4 + attached

LIGHTING - GENERAL

Exceptions
Discussion of qualifying exceptions on page 5-7

1. Interior Exceptions (Section 1316.1)

☐ **No Interior Lighting.** The building plans and specifications do not call for new or altered interior lighting. Skip to item 4, Exterior building Lighting - General, below.

☐ **Exception.** The building or part of the building qualifies for an exception from code lighting requirements. The applicable code exception is Section:

Exception(s)

Exceptions
Discussion of qualifying exceptions on page 5-8

2. Local Shut-off controls (Section 1316.1.2.1,1)

☐ **Complies.** At least one local shut-off lighting control for every 2,000 square feet of lighted floor area and for all spaces enclosed by walls or ceiling height partitions. This control(s) is detailed in the building plans on drawing number: L1

☐ **Exception.** The building or part of the building qualifies for an exception. The applicable code code exception is Section 1316.1.2.1.1, Exception:

Portions of the building that qualify:

Exceptions
Discussion of qualifying exceptions on page 5-9

3. Office Controls (Section 1316.1.2.1,2)

☐ **Not Applicable.** Contiguous office floor area is not over 2,000 square feet.

☐ **Complies.** All interior lighting systems are equipped with a separate automatic control to shut off the lighting and local override switching. These control(s) are detailed in the building plans on drawing number: L1

☐ **Exception.** The building or part of the building qualifies for an exception. The applicable code exception is Section 1316.1.2.1,2, Exception:

Portions of the building that qualify:

Exceptions
EXTERIOR BUILDING LIGHTING is lighting directed to illuminate the exterior of the building and adjacent walkways and loading areas with or without canopies

4. Exterior Building Lighting - General

☑ **No Exterior Building Lighting.** Skip the rest of this form.

☐ **Complies.** Complete items 5 and 6 below.

5. Exterior Building Lighting Controls (Section 1316.1.2.2)

☐ **Complies.** The building plans require that all exterior building lighting is equipped with automatic controls described in Sec. 1316.1.2.2. These controls are detailed in the building plans on drawing number.

☐ **Exception.** The exterior building lighting is intended for 24-hour continuous use.

6. Exterior Building Lighting Power (Section 1316.2.2)

☐ **Complies.** The plans do not call for incandescent lamps greater than 10 Watts for use in exterior building lighting.

☐ **Exception.** The building plans indicate luminaires with incandescent lamps greater than 10 Watts, but they are 5 percent or less of the total installed exterior lamps.

Total number of exterior lights:

Total number of exterior incandescent lights:

INTERIOR CONTROL CREDITS (if applicable)

LUMINAIRE MAINTAINENANCE CONTROL

A device capable of maintaining a preset illumination level by automatically adjusting the luminaire power.

DAYLIGHT SENSING CONTROL

A device that adjusts the power input to an electric lighting near windows to maintain desired workplace illumination, taking advantage of daylight. Should be capable of reducing electric power to 50 percent or less of maximum power. Three typical types of daylight sensing controls are:

Single-stepped control - Automatically turns a light on or off when daylight levels exceed lighting requirments.

Multi-stepped dimming - Dims light in discrete steps. For example, dims light by 25 percent, 50 percent, 75 percent and off.

Continuous dimming - Dims light in a continuous fashion.

Appellant:	Alexander Lungershausen, 503-227-1254 FAX: 503-227-7818
Plan Reviewer:	Jerry Engelhardt
Permit Number:	01-152908-000-00-CO
Stories/Occ/Type:	2 / B / V-1 HR
RE:	Alteration of/addition to an existing structure
Proposed Use:	Office Building
Project Address:	733 SW Oak St

1. BUILDING CODE SECTION: Chapter 6, Types of Construction

BUILDING REGULATION REQUIREMENT

That certain elements of a building's structure must satisfy the fire-resistive requirements of Table 6-A. For Construction Type V 1-hour, Table 6-A requires that floor-ceiling assemblies be of 1-hour fire-resistive construction. Table 7-C Minimum Protection for Floor and Roof Systems indicates that 3.2 inches of concrete (carbonate aggregate) provides 1-hour protection.

BUILDING PROPOSED DESIGN

We are proposing to retain the existing concrete floor-ceiling structure, although it includes slab sections that are less than 3.2 inches thick, for the reasons described below.

City of Portland
APPROVED
JUL 30 2002
Permit Number

Appeal Number B-11 (Continued)

REASON FOR ALTERNATE

The current renovation work incorporates changes and upgrades only within the existing 2-story structure. If this was the extent of all future work, the building would satisfy the requirements of Type V-N. But in order to retain the option of constructing an additional floor (penthouse) in the future, the Code Analysis for this building was based on Type V 1-hour construction rather than Type V-N, a construction type which is limited by Table 6-A to structures no more than 2 stories high. The ceiling-floor construction over the second floor was originally designed (1913), as was the entire structural frame of the building, to accommodate additional floors. This "deck" is a monolithically poured reinforced concrete joist and beam frame with short-span 2" reinforced slabs. See the attached drawings. In the current renovation work the deteriorated plaster ceiling finish above the second floor space is being removed, new lighting is being installed and an HVAC system, including ducting, is planned to be installed in what is now attic space above this floor-ceiling assembly. It is desirable to keep the floor-ceiling structure exposed. We think the general fire-resistive construction of the structure and decks and the relatively short sections of thin slabs make this an acceptable equivalent to the 1-hour floor-ceiling assembly required by the Code. Other elements of the 1-hour floor-ceiling assembly, including fire dampers at duct penetrations, would be in full compliance with the Code.

The Administrative Staff reviewed the appeal, and the following decision was reached:

1. Construction type/classification: **Granted provided,** in the future, should a third story be constructed on the building, the building will be sprinklered per the Fire Marshal's Office.

Office of Planning and Development Review

Appeal Number B-12

Owner:	Balfour-Guthrie LLC
Appellant:	David Shelman, 503-227-1254 FAX: 503-227-7818
Plan Reviewer:	Jerry Engelhardt
Permit Number:	01-152908-000-00-CO
Stories/Occ/Type:	2 / B w/ accessory A-3 / V-1 HR
RE:	Alteration of/addition to an existing structure
Proposed Use:	Office Building
Project Address:	733 SW Oak St

1. BUILDING CODE SECTION: Chapter 29 – Minimum Plumbing Fixtures.

BUILDING REGULATION REQUIREMENT

The number of fixtures to at least equal the minimum quantity listed in Table A-29-A.

BUILDING PROPOSED DESIGN

This appeal applies to the 2nd floor that will be occupied by one tenant. The user intends to use the building for office use and wants to include a large meeting room (A.3) as an accessory function. We are proposing to provide the number of fixtures on this floor that the Code requires for a B occupancy: (6000 sq. ft. (entire floor) divided by 220 l.f. = 30/2 results in 1 male and 1 female fixture plus 1 lavatory each) without factoring in an additional load for infrequent use of the meeting room.

REASON FOR ALTERNATE

The toilet facilities already exist in the building with the right number of fixtures for a B occupancy. They are being refurbished but we desire not to have to change the infrastructure (rough in). In this organization the meeting room is used once a month for a 1-2 hour meeting of on-site and off-site personnel. Therefore it is felt that for less than 10% of the time there is a greater demand on the sanitary facilities than occurs on a day-to-day basis.

Administrative Appeal Action 4-24-02
Office of Planning and Development Review

Appeal Number B-12 (Continued)

2. BUILDING CODE SECTION: 1004.2.3.2, 1004.2.3.3, 1004.2.4

BUILDING REGULATION REQUIREMENT

1004.2.3.2 establishes the requirement that the 2nd floor needs 2 exits. 1004.2.3.3 defines individual spaces that require more than 1 exit. 1004.2.4 states that where 2 or more exits are required to serve an area that at least 2 of these exits must be separated by a distance equal to half the greatest diagonal distance that can be measured across the space being served.

BUILDING PROPOSED DESIGN

The area being planned is for an office tenant on the 2nd floor. See the attached plan for the layout of spaces. On this floor there are two areas that need 2 exits per Table 10-A; the meeting room at the north end of the floor, and the office area that takes up most of the remaining floor area. The greatest diagonal in the office area is 98 feet. There are two routes out of this area. The south route leads to stair 1 and continues to the building main entrance on the ground floor. The north route leaves the office area past column #11 and proceeds through the vestibule to stair 2. There are 2 lines representing the distance between exits, depending on which points are determined to be the "exits." The 49' long line represents an exit scheme that moves occupants through 1 adjacent room and would not require an appeal. The more conservative, 40' long line is the distance between the circulation paths that leave the open office area. This would require an appeal.

REASON FOR ALTERNATE

The existing building creates a number of constraints when complying to all respects of the Code, including the pre-existing locations of structure and stairwells. Working within the program for the space the proposed plan makes an attempt to conform as closely as possible to the Code's exiting requirements.

The Administrative Staff reviewed the appeal, and the following decision was reached:

1 Fixture count: **Granted as proposed.**

2. Separation of exits at 2nd floor tenant space: **Granted as proposed.**

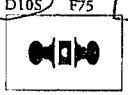
Functions

ANSI A156.2 Series 4000 Grade 1

Non-Keyed Locks

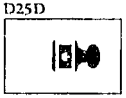
SCHLAGE ANSI

D10S F75 — Passage Latch
Both knobs/levers always unlocked. ▲



D12D F89 — Exit Lock
Unlocked by lever inside only. Outside lever always fixed. (Athens, Rhodes, and Sparta designs only.)

D25D — Exit Lock
Blank plate outside. Inside knob/lever always unlocked. (Specify door thickness, 1¾" or 1¾".)



D40S F76 — Bath/Bedroom Privacy Lock
Push-button locking. Can be opened from outside with small screwdriver. Turning inside knob/lever or closing door releases button.

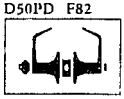
D44S — Hospital Privacy Lock
Push-button locking. Unlocked from outside by turning emergency turn-button. Turning inside knob/lever or closing door releases button.

D170 — Single Dummy Trim
Dummy trim for one side of door. Used for door pull or as matching inactive trim

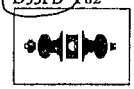
Keyed Locks

SCHLAGE ANSI

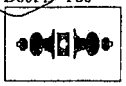
D50PD F82 — Entrance/Office Lock
Push-button locking. Push-button locks outside lever until unlocked with key or by rotating inside lever. (Athens, Rhodes, and Sparta designs only.)



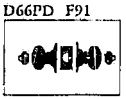
D53PD F82 — Entrance Lock
Turn/push-button locking: pushing and turning button locks outside knob/lever requiring use of key until button is manually unlocked. Push-button locking: pushing button locks outside knob/lever until unlocked by key or by turning inside knob/lever. ▲



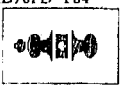
D60PD F88 — Vestibule Lock
Unlocked by key from outside when outside knob/lever is locked by key in inside knob/lever. Inside knob/lever is always unlocked.



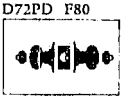
D66PD F91 — Store Lock
Key in either knob/lever locks or unlocks both knobs/levers. ◆



D70PD F84 — Classroom Lock
Outside knob/lever locked and unlocked by key. Inside knob/lever always unlocked. ▲



D72PD F80 — Communicating Lock
Key in either knob locks or unlocks each knob independently. ◆



D73P F90 — Corridor Lock
Locked or unlocked by key from outside. Push-button locking from inside. Turning inside knob/lever or closing door releases button.

Vandlgard™ Keyed Lever Locks NEW

Vandlgard™ is designed to disengage the outside spindle from the latch when in the locked condition. The locked outside lever freely rotates up and down while remaining securely locked. The free wheeling lever eliminates the ability to exert excessive force or to stand on the lever, preventing damage to internal lock components. Available in the Entrance/Office, Entrance, Classroom and Storeroom functions in all of the D-Series lever designs and finishes.

Keyed Lever Locks For Small Format Interchangeable Cores NEW

D-Series Keyed Lever Locks are available with levers and internal components to accept 6 or 7 pin small format interchangeable core cylinders, provided by others, that are manufactured by Arrow®, Best®, Falcon®, and KSP®. Available in Rhodes design only in the Entrance/Office, Entrance, Classroom, Corridor, Storeroom, Electrically Locked and Electrically Unlocked functions. Also available in Vandlgard™ functions. To order, substitute suffix letter P with suffix letter B. Example: D53BD

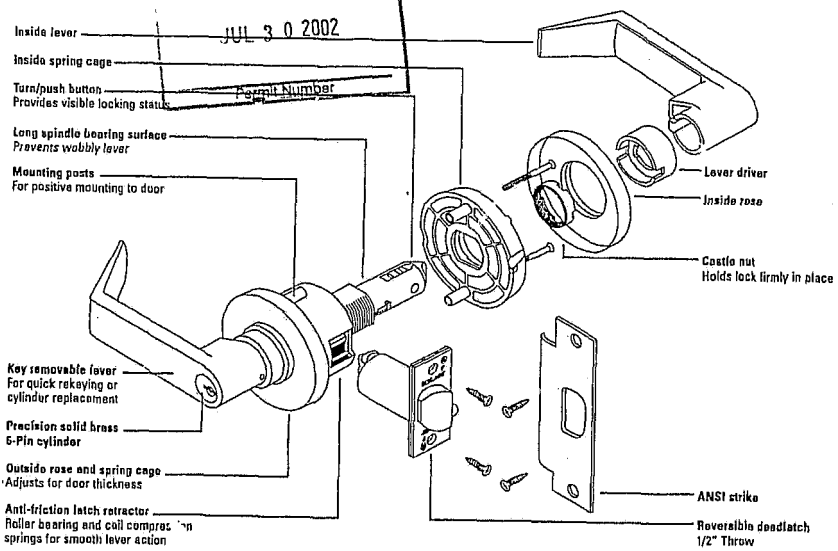
Cutaway View



Performance Features

Exceeds 800,000 cycle ANSI Grade 1 requirements.

Exceeds ANSI A156.2, 1996, Series 4000 Grade 1, lock lever torque requirements.

U.L. Listed for 3-hour doors.

Precision solid brass 6 pin cylinder with nickel silver pins and keys available in all Schlage keyways.

Key removable outside lever for quick rekeying and easy cylinder replacement.

Independent heavy duty spring cages for effective lever support.

Thru-bolted mechanism for positive interlock to door.

Non-handed levers.

Concealed mounting screws.

Cylindrical housing–heavy gauge cold rolled steel mechanisms are corrosion treated for normal atmosphere conditions.

Roller bearings and coil compression springs on anti-friction latch retractors ensure smooth lever action.

Athens, Rhodes, and Sparta available with interchangeable cores.

Available in tactile warning version for handicapped codes.

Interchangeable core, Primus, and Primus interchangeable core cylinders available.
