

COMPREHENSIVE PLAN

Combined Sewer Basin Boundary
 Combined Sewer Subbasin Boundary
 Depth to Groundwater 10ft Contours*

Estimated Depth to Seasonal High Water Table*

- ≤ 10 feet
- >10 to 20 feet
- >20 to 30 feet
- >30 to 50 feet
- > 50 to 70 feet
- > 70 to 90 feet
- >90 to 110 feet
- ≥ 110 feet

City Boundary

Combined Sewer Basins:
 Maintained by Bureau of Environmental Services (Sept. 2008).

*Note: The depth to seasonal high water table values shown are provisional data from the USGS and are under review. These data are interpolated from observed local groundwater and surface water elevations where spatial variability due to widely ranging groundwater monitoring locations has not been incorporated. As such, groundwater depth should be verified with field measurements where site specific work is desired and where depth to groundwater is considered important.
