| 729 | Andrea Sanchez | Support with changes | I want to know where is the tribal or Native American committee for this issue. When this town was illegal built with no permission from the natives. These very toxic companies built their building around our natural fresh water resources. This well and is very poisonous for human and animal consumption emerging in the water can cause disease and issues with health and well being. Companies like simplot the community dump the steal mill the old paper mill the sewage issues. These neglagence of placing these building for profit have impacted the air water around not to mention all the pesticide around sauvie island from farming not organically also not to mention the old toxic radiation plant down the river cause the water to heat up. There is so many issues thay have not been addressed and need an update immediately. Our salmon and wild life is being impacted all these areas. We need changes made immediately and those toxic places moved away from the rive area. This is all talk but we need actions! Water is life this impacts salmon eagles birds different species of fish and humans children babies. What falls from heaven water goes back to heaven and back again. | No | 08/30/23 2:32 PM |
