| | 611 | Anonymous | Support with changes | We need stronger compliance and oversight of public officials cell phone and email use. It's ironic the mayor is pushing this proposal when he was found to have circumvented the very software the city pays for compliance and oversight of public officials device. So absent some way to ensure compliance with this tech why would we spend Money on it if people can circumvent and use personal phone. | No | 07/01/24 1:35 PM |
