Testimony to on the **PCEF Community Responsive Grants program (RFP 3), Ordinance Draft**

Hello, Ya'aat'eeh, I am a Co-Director at Prismid Sanctuary, a Placemaking land project for BIPOC Artists and Cultural Workers in St. Johns neighborhood. We are honored and humbled to have submit and receive a PCEF grant to support our community of Artists and Cultural Workers. We will be rebuilding our land project, which we are working hard to ensure will include the best clean energy certifications we can with the funds granted to us. It is important to us as BIPOC artists and cultural workers that the land, water, air, flora and fauna are centered in our values of responsibility and reciprocity. We hope that in the future of PCEF funding that Regenerative Agriculture is equally funded within our community spaces in order to do the important work of uplifting and bringing forward Indigenous Traditional Environmental Cultural Knowledge, which is important for Portland as a whole to bring balance to our relationship to land and environment as we navigate building resilience within the current climate crisis. Thank you once again for stewarding this important funding. Mick Rose they/them Diné, Omaha, Pawnee Co-Director Prismid Sanctuary Native Community member Northwest Indigenous Food Sovereignty Alliance co-founder
