November 12

Agenda

- Open Contracting Data Standard program update (Gennie Nguyen)
- Update on housing status and living status demographic data standard (Christine Kendrick)
- SAP in Power BI data governance issue document
- Internal data sharing best practices scoping
  - Review feedback protocol and process
  - Breakout room discussions:
    - **MOUs, terms of use and authority**

Brief description: *When should specific terms be recorded for how shared data is used, when should terms and conditions not be used, should we create boilerplate & what would be in it, how would this be enforced, what happens if terms were violated*

Technology considerations - how to share

Brief description: *What tools are available to share raw data, GIS, sensitive data, interview data, audio data. Do best practices and help guides already exist for these tools?*

Data visualizations, dashboards and reports

Brief description: *What best practices should we have for internal data collated, organized and/or visualized in dashboards and reports*

Support and Documentation

Brief description: *What best practices do we need documented, what kind of support/help guides do people need for internal data sharing*
