RE:

Damage to a house located at 3141 - 3143 NE Couch ST, Portland, OR. Used by Buckman-Kerns Green Street and Sewer Project during May - June 2025.

Vibration of heavy equipment used in this project weakened the structure of the building resulting in cracking of the foundation, chimney, and elevation of the house. That process, according to my observation of the building, has progressed.

A sign restricting use of heavy trucks on the street between 31st - 32nd NE Couch ST was removed for an unknown reason, but I'm unsure when.

Repeated attempts have been made to request that the damage of the 3141 - 3143 house be inspected, compensated and rendered by the responsible city authorities.

According to a phone conversation on May 22nd, 2025 to Debbie Caselton to conserve the condition and damage of the house, she promised to call me back or send a letter concerning the case. As of now I have not gotten any message from the involvement office.

I am waiting for a positive resolution to my case.

Sincerely,

Christopher Serafin.
