The Killingsworth Street Improvements Project is one of two project areas that are the focus of the Station Access Street Improvements Project that focuses on two key opportunity areas along the Interstate Max light rail line: N Killingsworth Street and N Russell Street. This project is partially funded by a grant from the Transportation and Growth Management (TGM) Program, a joint program of the Oregon Department of Transportation and the Oregon Department of Land Conservation and Development. This TGM grant is financed, in part, by federal Transportation Equity Act for the 21st Century (TEA-21, local government, and the State of Oregon funds).

The contents of this document do not necessarily reflect views or policies of the State of Oregon.
