| <b>Table of Contents</b>                                                                  |             |
| <b>How to Use This Manual</b>                                                             |             |
| <br><b>1.0 General Requirements &amp; Policies</b>                                        |             |
| <i>Summary of Chapter 1.0</i>                                                             | 1-1         |
| 1.1 Purpose and Applicability of Manual                                                   | 1-1         |
| 1.1.1 Purpose of Manual                                                                   | 1-1         |
| 1.1.2 Applicability of Manual                                                             | 1-2         |
| 1.2 Summary of Manual Contents                                                            | 1-2         |
| 1.3 Definitions                                                                           | 1-5         |
| 1.4 Stormwater Destination/Disposal                                                       | 1-17        |
| 1.4.1 The Purpose of Stormwater Destination/Disposal                                      | 1-17        |
| 1.4.2 Destination/Disposal Requirements                                                   | 1-17        |
| <i>Exhibit 1-1: Stormwater Destination/Disposal Hierarchy</i>                             | 1-18        |
| 1.4.3 Destination/Disposal Standards                                                      | 1-20        |
| 1.4.4 Requirements for Underground Injection Controls                                     | 1-22        |
| 1.5 Pollution Reduction                                                                   | 1-24        |
| 1.5.1 The Purpose of Pollution Reduction                                                  | 1-24        |
| 1.5.2 Pollution Reduction Requirements                                                    | 1-25        |
| <i>Exhibit 1-2: Pollution Reduction Facility Removal Capabilities for TMDL Parameters</i> | 1-27        |
| 1.6 Flow Control                                                                          | 1-29        |
| 1.6.1 The Purpose of Flow Control                                                         | 1-29        |
| <i>Exhibit 1-3: Retention Vs. Detention Hydrographs</i>                                   | 1-31        |
| 1.6.2 Flow Control Requirements                                                           | 1-32        |
| <i>Exhibit 1-4: General Areas Where Flow Control May Not Be Required</i>                  | 1-33        |
| 1.7 Open Drainageway Policies                                                             | 1-36        |
| 1.8 Non-Conforming Use Parking Lots                                                       | 1-38        |
| 1.9 Discharging to Existing Stormwater Management Facilities                              | 1-39        |
| 1.10 Public vs. Private Stormwater Management                                             | 1-40        |
| 1.11 Special Circumstances                                                                | 1-41        |
| <i>Form SC: Special Circumstances</i>                                                     | 1-42        |

| <b>Chapter</b>                                                       | <b>Page</b> |

| 2.2 Design Methodologies                                             | 2-3         |
| 2.2.1 Simplified Approach                                            | 2-3         |
| <i>Form SIM</i>                                                      | 2-5         |
| 2.2.2 Presumptive Approach                                           | 2-7         |
| <i>Exhibit 2-2: Checklist of Calculations to be Included</i>         | 2-8         |
| <i>In Stormwater Report</i>                                          |             |
| <i>Exhibit 2-3: Example Cross-Section of Vegetated Street</i>        | 2-11        |
| <i>Swale Modified to Receive Credit for Disposal</i>                 |             |
| <i>Exhibit 2-4: Surface Infiltration Facility Setback Detail</i>     | 2-13        |
| 2.2.3 Performance Approach                                           | 2-14        |
| 2.3 Hydrologic Analysis Requirements                                 | 2-15        |
| 2.3.1 Pollution Reduction                                            | 2-15        |
| 2.3.2 Flow Control                                                   | 2-15        |
| 2.3.3 Destination/Disposal                                           | 2-16        |
| 2.3.4 Conveyance                                                     | 2-16        |
| 2.3.5 Hydrologic Analysis Method Resources                           | 2-16        |
| 2.4 Infiltration Testing                                             | 2-17        |
| 2.4.1 Initial Feasibility Testing                                    | 2-17        |
| <i>Exhibit 2-5: Infiltration Testing Summary Table</i>               | 2-18        |
| 2.4.2 Design Testing                                                 | 2-18        |
| 2.4.3 Post-Construction Testing                                      | 2-19        |
| 2.4.4 Laboratory Testing                                             | 2-19        |
| <i>Exhibit 2-6: Falling Head Test Requirements</i>                   | 2-20        |
| 2.5 Control Structures for Detention Systems                         | 2-21        |
| 2.5.1 Design Requirements                                            | 2-21        |
| <i>Exhibit 2-7: Orifice Location Tee Riser</i>                       | 2-23        |
| <i>Exhibit 2-8: Orifice Location Baffle Riser</i>                    | 2-24        |
| <i>Exhibit 2-9: Orifice Structure</i>                                | 2-25        |
| 2.6 Access for Operations and Maintenance                            | 2-27        |
| 2.7 Landscaping Requirements                                         | 2-27        |
| 2.8 Outfall Design                                                   | 2-29        |
| <i>Exhibit 2-10: Typical Outfall Layout with Energy Dissipation</i>  | 2-30        |

| <b>4.0 Source Controls</b>                                                                              |             |
| <i>Summary of Chapter 4.0</i>                                                                           | 4-1         |
| 4.1 Introduction and Applicability                                                                      | 4-1         |
| 4.1.1 Site Uses and Characteristics that Trigger Controls                                               | 4-3         |
| 4.1.2 Goals and Objectives for Source Control                                                           | 4-4         |
| 4.1.3 Signage Requirements                                                                              | 4-4         |
| 4.1.4 Request for Alternative Method of Source Control                                                  | 4-5         |
| 4.1.5 Additional Requirements                                                                           | 4-5         |
| 4.2 Fuel Dispensing Facilities and Surrounding Traffic Areas                                            | 4-8         |
| 4.2.1 Applicability                                                                                     | 4-8         |
| 4.2.2 Requirements                                                                                      | 4-8         |
| 4.3 Above-Ground Storage of Liquid Materials                                                            | 4-12        |
| 4.3.1 Applicability                                                                                     | 4-12        |
| 4.3.2 Requirements                                                                                      | 4-12        |
| 4.4 Solid Waste Storage Areas, Containers, and Trash Compactors                                         | 4-15        |
| 4.4.1 Applicability                                                                                     | 4-15        |
| 4.4.2 Requirements                                                                                      | 4-15        |
| 4.5 Exterior Storage of Bulk Materials                                                                  | 4-18        |
| 4.5.1 Applicability                                                                                     | 4-18        |
| <i>Exhibit 4-1: Bulk Material Categories</i>                                                            | 4-18        |
| 4.5.2 Requirements                                                                                      | 4-18        |
| 4.6 Material Transfer Areas/Loading Docks                                                               | 4-21        |
| 4.6.1 Applicability                                                                                     | 4-21        |
| 4.6.2 Requirements                                                                                      | 4-21        |
| 4.7 Equipment and/or Vehicle Washing Facilities                                                         | 4-25        |
| 4.7.1 Applicability                                                                                     | 4-25        |
| 4.7.2 Requirements                                                                                      | 4-25        |
| 4.8 Stormwater and Groundwater Management For Development On Land With Suspected or Known Contamination | 4-28        |
| 4.8.1 Applicability                                                                                     | 4-28        |
| 4.8.2 Requirements                                                                                      | 4-29        |
| 4.9 Covered Vehicle Parking Areas                                                                       | 4-36        |
| 4.9.1 Applicability                                                                                     | 4-36        |
| 4.9.2 Requirements                                                                                      | 4-36        |
| 4.10 Forms and Reference Materials                                                                      | 4-37        |
| <i>Signage Examples</i>                                                                                 | 4-37        |
| <i>Source Control Installations Form</i>                                                                | 4-39        |
| <i>Special Requests Form</i>                                                                            | 4-40        |
