

RESTORE THE HEALTH AND SAFETY OF FOREST PARK

Forest Park has been identified as a unique urban wilderness environment protected by land use law, as stated in the Forest Park Natural Resources Management Plan. For the past 70 years Forest Park has been carefully managed with preservation and restoration of native resources as the highest priority. As a result, today Forest Park has more native species than any other city park in the nation. Scientists have determined that Forest Park has more interior forest habitat than any other city park in the world. However, nationwide this habitat and many of the species it supports are threatened. The Management Plan calls for passive recreational use that does not degrade the natural resources and requires that trail management support safe use by all user groups.

PETITION To: Mayor Hales, City Commissioners Fish, Novick, Fritz and Saltzman and Director of Portland Parks Abbate

- TO UPHOLD THE GOALS OF FOREST PARK NATURAL RESOURCES MANAGEMENT PLAN
- 92% OF PARK USERS ARE PEDESTRIANS. BICYCLES ARE ILLEGALLY TAKING OVER PEDESTRIAN-ONLY TRAILS IN FOREST PARK, CAUSING SAFETY HAZARDS AND DAMAGING TRAILS. PORTLAND PARKS AND RECREATION RESOURCES MUST BE PRIORITIZED TO ADDRESS THIS THREAT TO USER SAFETY. LAWS GOVERNING BICYCLES IN FOREST PARK MUST BE ENFORCED. NO NEW TRAILS SHOULD BE CONSIDERED UNTIL EFFECTIVE ENFORCEMENT IS IN PLACE. ACTIVITIES THAT THREATEN USER SAFETY OR HARM THE HEALTH OF THE PARK MUST BE PROHIBITED.

RESTORE THE HEALTH AND SAFETY OF FOREST PARK

Forest Park has been identified as a unique urban wilderness environment protected by land use law, as stated in the Forest Park Natural Resources Management Plan. For the past 70 years Forest Park has been carefully managed with preservation and restoration of native resources as the highest priority. As a result, today Forest Park has more native species than any other city park in the nation. Scientists have determined that Forest Park has more interior forest habitat than any other city park in the world. However, nationwide this habitat and many of the species it supports are threatened. The Management Plan calls for passive recreational use that does not degrade the natural resources and requires that trail management support safe use by all user groups.

PETITION To: Mayor Hales, City Commissioners Fish, Novick, Fritz and Saltzman and Director of Portland Parks Abbate

- TO UPHOLD THE GOALS OF FOREST PARK NATURAL RESOURCES MANAGEMENT PLAN
- 92% OF PARK USERS ARE PEDESTRIANS. BICYCLES ARE ILLEGALLY TAKING OVER PEDESTRIAN-ONLY TRAILS IN FOREST PARK, CAUSING SAFETY HAZARDS AND DAMAGING TRAILS. PORTLAND PARKS AND RECREATION RESOURCES MUST BE PRIORITIZED TO ADDRESS THIS THREAT TO USER SAFETY. LAWS GOVERNING BICYCLES IN FOREST PARK MUST BE ENFORCED. NO NEW TRAILS SHOULD BE CONSIDERED UNTIL EFFECTIVE ENFORCEMENT IS IN PLACE. ACTIVITIES THAT THREATEN USER SAFETY OR HARM THE HEALTH OF THE PARK MUST BE PROHIBITED.

Restore the Health and Safety of Portland's Forest

Forest Park has been identified as a unique urban wilderness environment protected by land use law, as stated in the Forest Park Natural Resources Management Plan. For the past 70 years Forest Park has been carefully managed with preservation and restoration of native resources as the highest priority. As a result, today Forest Park has more native species than any other city park in the nation. Scientists have determined that Forest Park has more interior forest habitat than any other city park in the world. However, nationwide this habitat and many of the species it supports are threatened. The Management Plan plan calls for passive use that does not degrade the natural resources and requires that trail management support safe use by all user groups.

WE PETITION Mayor Hales, City Commissioners Fish, Novick, Fritz and Saltzman and Director of Portland Parks Abbate

-TO UPHOLD THE GOALS OF FOREST PARK NATURAL RESOURCES MANAGEMENT PLAN

- 92% OF PARK USERS ARE PEDESTRIANS. BICYCLES ARE ILLEGALLY TAKING OVER PEDESTRIAN-ONLY TRAILS IN FOREST PARK, CAUSING SAFETY HAZARDS AND DAMAGING TRAILS. PORTLAND PARKS AND RECREATION RESOURCES MUST BE PRIORITIZED TO ADDRESS THIS THREAT TO USER SAFETY. LAWS GOVERNING BICYCLES IN FOREST PARK MUST BE ENFORCED. NO NEW TRAILS SHOULD BE CONSIDERED UNTIL EFFECTIVE ENFORCEMENT IS IN PLACE. ACTIVITIES THAT THREATEN USER SAFETY OR HARM THE HEALTH OF THE PARK MUST BE PROHIBITED.

Restore the Health and Safety of Forest Park Comments or Questions

I have been surprised by bikes coming around the corner on pedestrian only trails frequently and have seen bike tracks on most of the trails
Good work!

I hike the Park several times per month. I also ride a Mtn bike but never on Park single track trails
I've made many comments over the past year

I love to walk and run in Forest Park, and worry about its health if single-track cyclists are given more free rein. Single-trackers would hurt vegetation, wildlife, trails, people, dogs and take away from the peace and beauty of the park.

There is also a need for ongoing funding for critical maintenance programs such as invasive species management. I was shocked to learn the city plans to eliminate funding for those programs.

I also wrote a letter to Mayor Hales regarding this issue and have not received any response.

I love to walk on the trails at Forest Park and would like to see the park maintained long into the future.

Though I'm not a Portland resident, I treasure the regional aspect of Forest Park and use the trails frequently. Leif Ericson/Fire Lanes? great for bikes. Single track trails? will ruin both the environment and the peace if bikers use them. Thanks.

Forest Park is not only a Portland but a regional treasure. Please don't let it continue to deteriorate.

I recently took a young woman from Vermont to FP from Germantown to Springville.

Wait until after the fluoridation election is over.

Will be out of the country until Oct.

Bicycles and walkers do not belong on the same trails. I've nearly been knocked down a couple of times by bikes coming fast downhill with short lines of sight. Very dangerous to all.

Thank you

I am saddened to see not only trails on the outer edges of Forest Park degraded by bicyclers, but the inner sections of the Wildwood trail. Many of the cyclist are riding during the late afternoon, early morning or evening hours. I have witnessed all three on the Macleay side of Wildwood. In addition, riders speed down Holman lane, which is posted as uphill only.

I have lived in this neighborhood and walked in Forest Park for over 40 years. I have had many frightening encounters with bicyclists on speeding around blind corners on Wildwood Trail. I'm able to jump out of the way. I doubt that families with young children would be so lucky.

most of the trails are not designed for both walkers with dogs and cyclists, I have had two narrow misses for collisions with well meaning cyclists - the combination of a rapidly expanding user population and cycle traffic will cause severe damage to trails

I have so many wonderful memories wandering these trails as a child, and then again with neighborhood kids I've babysat or nannied for over the years. It would have been much more dangerous if not impossible to let a 3 year old explore the wonder of nature if there were the constant threat of a bicyclist racing down the trails. I am an avid biker and love biking, but it is also important for our community and for our children to keep trails pedestrian-only! Thank you!

The forest area in Portland is a valuable resource. Please keep it viable for and accessible for years to come.

As a long time resident of the periphery of Forest Park, the increasing stress on this incredible habitat becomes more apparent. I would suggest that whatever stopgap measures we can introduce to reasonably control any further trail and parking areas impact would certainly be to the common good. Re-naming and increasing the the preservational commitment will best serve the public good. I feel that an annual parking permit system along with an additional license fee levied on the trail bike community would help facilitate the needed funds for this most important reformation.

One winter day I was walking a puppy on the Cumberland trail. The puppy was on a 5' leash. We were almost at a corner going up hill and could not see the trail in front of us when suddenly around the corner, coming down the hill was a bicyclist. He was going fast and could not stop in the mud. I went to one side of the trail and the puppy, terrified, went to the other side. He went between us. I fortunately had the sense to drop the leash and the bicyclist rode over it. It was really frightening. We could have been badly hurt. I have walked almost every trail in Forest Park. The trails in Forest Park are narrow, sometimes steep and very slippery in the winter. I do not see how it would be possible to have trails with both bikes and pedestrians sharing the trail. In the last thirty years the use of the park has increased significantly. I no longer walk it on sunny summer weekends. So where would you put the bicycle trails? And if you made 30% of the trails "bike friendly" that, in fact, reduces already crowded pedestrian access to the remaining 60% as the bikes would quickly force pedestrians off the "bike friendly" trails.

Why reward an inconsiderate user group by adding more trails for them to abuse? There are numerous options on land owned by metro or in logged off areas way out skyline--send them there where they will not intimidate pedestrians, children and the elderly. Thank you.

I use the trails of Forest Park as a blind person with a guide dog and I cannot jump out of the way when a cyclist approaches at any speed. Most riders do not observe common courtesy by staying completely off the trails that are dedicated for pedestrians. There is no enforcement or follow through on the laws. Also, I want to remind people that Forest Park is a place that can be accessed by bus for those unable to drive. Mountain bikers should think about the fact that they frequently intimidate every other user of Forest Park. There are not many choices for those unable to drive. Thank you for your consideration.

Have you thought about asking the political pac that has put up all this money to lobby the council to use their money to purchase land close to the city and give it to metro and parks and recreation. They could design their own park strictly for mountain biking and it would be much better than trying to mix it up with pedestrians, children, the elderly, etc. Thanks.

bikes have enough paths as it is

I am opposed to single track biking in Forest Park!!

I live at the start of Wildwood Trail. My husband and I are well in our 70's and walk almost daily, alone or with our grandchildren. On occasion a biker has come along and almost run us off the trail./ It is scary and dangerous. Please don't let bikers take over these trails

Cycling shouldn't be a crime. Let's work with the bike community to promote safe bike use in Forest Park.

Restore the Health and Safety of Forest Park

- There are currently significant **risks to pedestrian safety in Forest Park** caused by widespread **illegal cycling** on pedestrian only trails.
- **The Forest Park Natural Resources Management Plan**, ordinance 168509, includes specific rules and guidelines to protect pedestrian safety:
 1. Bikes are limited to specified roads and fire lanes in the park.
 2. All trails open to bikes, which by definition are shared trails, must be 8 feet wide, must have good line of sight, must not conflict with other user groups (like equestrians) and must not terminate in a pedestrian trail which would channel cyclists to trails not open for their use.
 3. Park users must both be safe and feel safe.
- **City Ordinances** that are posted pertaining to cyclists in the park are unclear and out of date. The one most commonly posted in the park, 16.26.250, was repealed in 1992. If you google this ordinance the first 2 items you find, written by cyclists advertise the fact that this ordinance has been repealed
- As I understand it the current relevant citation is the ordinance that applies to restrictions on vehicles in parks is 16.70.560, which gives the Parks Superintendent the authority to restrict or prohibit types of vehicle traffic in parks. "Vehicle" includes bikes. For any such restriction to take effect, Parks must post a notice in a conspicuous place. There is no fine specified in that ordinance, which means that the general fine at 1.01.140 for violations of city ordinances applies: \$500. I have never seen these ordinances posted in the park!
- There is an ordinance that has recently been posted in Hoyt Arboretum, 16.70.560, which states that bikes using the paths can be impounded. As far as I know there is no method to enforce this intervention.
- **Signage** restricting bikes from pedestrian trails is not universal, is out of date and newer signs are easily vandalized. Park Ranger Bob McCoy told me that new signs are often gone in 2 days
- **Enforcement** is completely ineffective. The Park Ranger, Rob McCoy told me that he has not restricted a single cyclist's from the park during his tenure. The Ranger does not have the authority to cite trespassing cyclists.
- **Other cities** that allow cyclists in their city parks have much larger enforcement forces and more robust enforcement capabilities, and they still run into user conflicts and safety issues
- **The single track advisory Committee** of 2009-2010 specifically excluded safety as a consideration
- The leadership of the single track cycling community and some park staff have publicly admitted that they ride on the pedestrian trails

- **The biking community**, expressing themselves on the bikeportland.org site have made comments such as ,”these are rules not laws, it is not illegal to ride on pedestrian trails,” “get out your headlamps, the trails are open at night,” The back of the signs are blank, this is a free country”

Actions we are requesting from City Council have to do with Policy and Ordinances

- Please stand behind current land use law as articulated in the Forest Park Natural Resources Management Plan. The Plan’s rules and concepts serve to protect the Park and the safety of pedestrians
- Reinstate the repealed ordinance that is so widely posted in the park or clarify which ordinances apply with their associated fines.
- The ordinances need to be posted and need to be in effect. Universal signage is essential to any enforcement efforts. Consider stenciling signs on trees with nontoxic paint to reduce cost and vandalism
- Educate the community of cyclists and pedestrians
- Ask Parks to plan enforcement actions in coordination with police as suggested in the management plan to let cyclists know that the laws will be enforced.
- Given the limited force of rangers to enforce the law, ask Parks to fund and erect physical barriers such as stiles s to make it harder for cyclists to accidentally or intentionally ride on pedestrian only trails

We are presenting a petition from concerned citizens asking that the management plan be upheld and that pedestrian safety hazards be addressed. Any plans to add new trails or increase access for cyclists will make safety hazards to pedestrians greater. Resources must be directed towards pedestrian safety.

Subject: Restore the Health and Safety of Forest Park

Hello Susan, Marcy recommended that I send you a paragraph about our presentation to City Hall next Wednesday, June 19th. We will be presenting our petition with the above title but I will be adding comments and referring to other supporters of this idea as well as specific circumstances that make enforcement impossible and put pedestrian safety at risk. Let me know if you think this is OK. Thank you so much for guiding us through this process. Sincerely, Catherine Thompson, M.D.

Restore the Health and Safety of Forest Park

I am coming to City Council to ask for help in addressing the current safety hazard to pedestrians in Forest Park caused by illegal cycling on pedestrian only trails. Individuals, medical groups and civic institutions have written letters to City Council and the Parks department over the past few years concerned about the safety hazards of sharing narrow trails. Trail sharing, which has never been approved, is happening right now! The safety and well being of pedestrians, who comprise 92% of park users, is being compromised. Citizens need the City Council to stand behind the Forest Park Natural Resources Management Plan, ordinance 168509, which recognizes the need for safe cycling in the park and safety protection for all users. Right now there is an enforcement failure. We lack clear and enforceable ordinances with specific fines that can be posted. Our single Forest Park Ranger has not excluded a single cyclist from the park during his tenure. Cyclists ride everywhere with impunity. A new enforcement strategy is needed that includes ordinances, universal vandal resistant and accurate signage, physical deterrents and interventions to stop illegal cycling on pedestrian only trails. Action by City Council is needed to establish policies and ordinances to protect the Park and law abiding park users. Thank you for your time. Catherine Thompson, M.D.

Hello Catherine,

I have a Communication spot reserved for you June 19th, 9:30 am at City Hall. If you could confirm that right now, that's all I need at this point.

We'll distribute any written material you would like to submit with the Council packets on Friday, June 14th. Please submit it by Thursday, June 13th, 5pm. Or, you may bring written material with you on the 19th and we'll distribute it as you are speaking.

Here is further information for you on the Communications portion of the agenda:

- You will have three minutes to address the Council and may also submit written material (please provide seven copies).
- We start the meeting at 9:30 and Communications are the first item on the agenda.
- Please note communications allow the Council to hear issues that interest our citizens, but do not allow an opportunity for dialogue.
- The Council meeting takes place at City Hall, 1221 SW 4th Ave., 2nd Floor, Council Chambers.

Kind regards,

Sue

Susan Parsons
