

Connecting neighborhood resources and building bridges within our diverse community:

South East Uplift (SEUL): Providing technical and organizational assistance to the people of Southeast Portland through neighborhood associations, community groups and organizations to enable them to effectively create communities which are sustainable, livable, diverse, inclusive, safe and vital.

Montavilla Neighborhood Association (MNA): Encouraging residents to engage with neighborhood businesses, schools and churches and become active members in their community. The vision of MNA is to have an atmosphere where the diverse voices within the community are heard. They wish to create an environment of acceptance, pluralism and equality for all members of the community.

Portland State University (PSU): Working in conjunction with SEUL and MNA to link and map the community assets such as, Faith-based organizations, schools and neighborhood businesses within the Montavilla community. PSU students were active in creating a comprehensive geographic map to better define the community.

Southeast Uplift Capstone Class Project
Summer 2006

Our Mission:

"Develop a replicable tool for SEUL to map the diversity of community resources, connect residents with opportunities for engagement, and build sustainable community capacity."
