Subject: Rezoning urban neighborhoods

To PSC. I am I favor of and support the zoning changes as proposed by such neighborhoods as Eastmoreland. The recent increase in building has seen some very sloppy and inconsiderate development that is within the limits of codes. Please adopt the changes to preserve urban areas, limit multi unit housing built to the curb without any parking allowances, and allow existing and new homes light and air. Those that build and demolish should have a process, however arduous, that takes into consideration those it affects with such changes. Thus preserving the character of each individual urban area or enhancing it as those associations of neighbors would expect in continuation of their quiet enjoyment.

Regards.
