**Subject:** Propane policy

Dear planners,

I strongly recommend that the City consult with independent experts on issues such as climate change, safety and jobs as opposed to relying on Pembina and the Port for its staff report. Also that all neighborhoods within the blast radius of transportation (trains and boats) and the facility need to be apprised of the risk at least 30 days before the hearing.

Also: the energy used to power buildings in the largest source of carbon pollution in Portland. Approving Pembina would be counter to our goal of being a national leader in responding to climate change.

Thank you.
