**Subject:** Please, NO Propane terminal at the N Portland Port

As a bureau of SUSTAINABILITY, facilitating the storage and transport of a fossil fuel is counter to Portland's stated mission regarding climate change. PLEASE do not site a propane facility in North Portland. 40 or 50 permanent jobs is really not worth the risk [and will all of those jobs go to Portlanders? Of course, not]. SAFETY is even more of a concern. While the Port may state that the risk is low, if an accident happens it is CATASTROPHIC.

- 
- 
- The City needs to consult with independent experts on issues such as climate change, safety and jobs as opposed to relying on Pembina and the Port for its staff report;
- All neighborhoods within the blast radius of the trains, boats and facility need to be apprised of the risk with at least 30 days notice before the hearing.
- Approving Pembina would be counter to our goal of being a national leader in responding to climate change.

Thanks,
